Re: 3% Raise From 2006 Supplemental Appropriations

As part of his fiscal year 2007 budget proposal Governor Kempthorne has proposed a 3% raise for State employees that would take effect in February 2006. Community colleges were included in this proposal.

In order to fund raises for the five remaining months of the 2006 fiscal year, a supplemental appropriation is required. The proposed supplemental appropriation for our academic program is $81,000 and for our professional technical programs is $48,400. Employees who are on benefits and paid with budgeted General Fund, student fee or enterprise account dollars will be eligible for the raise. Employees funded with grants will be eligible to the extent that the grant can absorb the increase in cost. In the past, most grants have been able to absorb these costs.

Using the above criteria, the total estimated cost of the 3% raise for the remaining five months of the year to the General Fund will be approximately $227,000. The $98,300 will be made up from reduced spending of budgeted departmental funds on a campus-wide basis. We are confident that this reduction will not have a negative impact on students when spread across the institution.

The supplemental appropriations will be built into our budget base for fiscal year 2007 and the balance of the years funding for the raise is included in our fiscal year 2007 request. This raise, given in February, is actually the July 1, 2007 raise being implemented five months early.

The 3% raise will cost us approximately $236,000 of institutional funds in addition to funds provided by the 2007 State appropriations in fiscal year 2007. These funds will come from increases in State appropriation due to the change in the division of funds with North Idaho College and other revenue accounts. Further analysis on all revenue accounts will be completed as the year progresses.

We respectfully request Board approval for the implementation of a 3% raise effective February 1, 2006.

Re: Dr. Taylor’s Bust

Dr. Taylor’s bust is becoming less visible as the trees surrounding it grow larger. These trees have thick foliage with branches trimmed at approximately seven feet in height. This makes it a dark area where it is difficult to keep grass growing. Additionally, this grouping of trees attracts an excessive number of birds and we have had complaints about droppings.

With the completion of the Fine Arts Addition and several other projects, we would like to investigate the possibility of relocating Dr. Taylor’s bust to a more visible location. Locations that we would like to consider include just east of the Taylor Building in the yard area or possibly in front of the Fine Arts Addition.

If the Board is open to the possibility of this relocation, we could bring some drawings of suggested locations to a future Board meeting.
