Paramedic Skills Tracking Log PARA 244

USING THIS FORM

During each field internship rotation it is imperative that the student record number of skills performed and observed. The purpose of paramedic skills tracking is to evaluate the paramedic student's progress in the program.

Assigned areas and skills will be recorded and placed into the FISDAP (field internship data acquisition project) database. It is expected that the student complete this form during the clinical rotation accurately recording number of observations and performances.

Instructions for completing this form:

Place number of skills observed on the left side of the box

Place number of skills performed on the right side of the box
