THE COLLEGE OF SOUTHERN IDAHO  
COMMUNITY COLLEGE DISTRICT  
JULY BOARD OF TRUSTEES MEETING  
JULY 21, 2008

CALL TO ORDER: 6:07 p.m. Presiding: LeRoy Craig

Attending: Trustees: LeRoy Craig, Dr. Charles Lehrman,  
Dr. Allan Frost, Donna Brizee and Dr. Thad Scholes

College Administration: Gerald L. Beck President  
John M. Mason, Vice President of Administration  
Robert Alexander, College Attorney  
Dr. Jim Gentry, Interim Executive Vice President and  
Chief Academic Officer  
Dr. Edit Szanto, Vice President of Student Services  
and Planning and Development  
Jeffrey M. Harmon, Dean of Finance  
Dr. Mark Sugden, Instructional Dean  
Dr. Cindy Bond, Instructional Dean  
Graydon Stanley, Dean of Students  
Randy Dill, Physical Plant Director  
Monty Arrossa, Human Resources Director  
Doug Maughan, Public Information Director  
Kathy Deahl, Administrative Assistant to the  
President

CSI Employees: None

Visitors: Dr. David McCluskey, Tom Ashenbrenner, Sonia Monreal,  
Kasey Warner and Tia Adamson

Faculty Representative: John Boling, Tonya Bowcut and Becky  
Brown

PACE Representative: Dannette Starr and Karon Myers

Times News: Andrea Jackson

KMVT: Benito Baeza

MINUTES OF THE EXECUTIVE SESSION OF JUNE 16, 2008 AND THE  
REGULAR SESSION OF JUNE 16, 2008 were approved on MOTION by  
Dr. Thad Scholes. Affirmative vote was unanimous.

TREASURER'S REPORT: The Treasurer's report was approved on MOTION by Donna Brizee. Affirmative vote was unanimous.

Bids:

1. The Board approved the sole bid from Main Street Motors of Boise, Idaho in the amount of \$30,000.00 for a 2004 F650 dump truck on MOTION by Dr. Allan Frost. Affirmation vote was unanimous.

Funding for this project is from the Plant Facility Fund.

2. The Board approved the sole bid of Stryker Communications of Flower Mound, Texas in the amount of \$41,194.22 for an in-light surgical camera, surgical rated LCD flat screen display, LED surgical light and associated supplies on MOTION by Dr. Charles Lehrman. Affirmative vote was unanimous.

Funding for this purchase is from the Community Based Job Training grant from the United States Department of Labor.

3. The Board approved the low bid of McCoy Freightliner in the amount of \$105,300 for the two specified Sprinter vans on MOTION by Dr. Charles Lehrman. Affirmative vote was unanimous.

Funding for this purchase is from the Plant Facility Fund.

PRESIDENT'S REPORT:

1. College of Southern Idaho Foundation President Tom Ashenbrener gave a report to the Board concerning Foundation operations and achievements over the last year. He noted that nearly \$900,000 in scholarships had been given, \$25,000 in mini-grants were awarded and that one in five full time students at the college received a Foundation scholarship. Mr. Ashebrener also discussed the major gift campaign and was optimistic the campaign would meet its goal of \$9,000,000.

2. Mike Mason reviewed the Head Start Ongoing Child Assessment report with the Board. The Board also reviewed the monthly Head Start fiscal report.

3. Randy Dill explained the proposed landscaping for the new Health Sciences and Human Services building. He indicated that the plans did not call for a sprinkler system and that we would have brown lawn for part of the year. Mr. Dill indicated that we were planting a new type of low maintenance grass on the Breckenridge Agricultural Endowment berm that requires minimal water and less mowing. If this grass works out, we will suggest it for the building but we will need a sprinkler system.

The Board advised administration to put a sprinkler system in all of the lawn areas for the new building.

4. Graydon Stanley introduced student members of the Magic Valley Tobacco Free Coalition and Dr. David McCluskey. Students Kasey Warner, Sonia Monreal and Tia Adamson gave a Powerpoint presentation that explained their proposal concerning making the College of Southern Idaho a smoke free campus. They reviewed an on line survey that indicated approximately 79% of the 960 respondents supported a smoke free campus.

The Board approved the adoption of a smoke free campus for the College of Southern Idaho to extend to the perimeter of the campus and all outreach center property on MOTION by Dr. Allan Frost. The Board also requested that the Coalition present a plan of action for implementation of the smoke free campus at the August 18, 2008 regular Board meeting. Affirmative vote was unanimous.

5. Randy Dill reported that the new Falls Avenue entry way would begin next Monday. The project is expected to be completed by September 12, 2008.

6. President Beck reported the following:

a. The Faculty Handbook has been reviewed with the faculty senate.

b. We have had several resignations due to special family situations.

c. Dr. Jeff Fox was selected as the Executive Vice President.

d. A new employee orientations was held.

e. Workforce alliance meetings have been held with industry leaders.

f. A wind generation maintenance curriculum has been submitted to the Idaho State Board of Education for approval.

g. The farewell for retiring College of Southern Idaho Foundation board members and the greeting of new members was held.

ADJOURNMENT was declared at 7:40 p.m.

  
\_\_\_\_\_  
John M. Mason,  
Secretary Treasurer

Approved: August 18, 2008

  
\_\_\_\_\_  
Chairman

July 21<sup>th</sup> 2008

To: President Beck and the College of Southern Idaho Board of Trustees

From: Jeffrey M. Harmon

Re: Dump Truck

We received one bid for a 26,000 Gross Vehicle Weight dual rear wheel dump truck. The unit is a 2004 Ford F650 with 19,300 miles.

Main Street Motors

\$30,000

Based on the review of the bid by Randy Dill, I recommend that we accept the sole bid from Main Street Motors of Boise Idaho in the amount of \$30,000 for the specified equipment.

Funding for this purchase is the Plant Facilities Fund.

July 21<sup>th</sup> 2008

To: President Beck and the College of Southern Idaho Board of Trustees

From: Jeffrey M. Harmon

Re: Surgical Suite

We received one bid for the surgical suite equipment and supplies.  
The bid is as follows:

Stryker Communications	\$41,194.22
------------------------	-------------

Based on the review of the bid by Dr Mark Sugden and Dr Ken Campbell, I recommend that we accept the sole bid from Stryker Communications of Flower Mound, Texas in the amount of \$41,194.22 for the specified equipment.

The equipment will make it possible for students at CSI to engage in learning via telecommunicated video from an operating room to a class room at CSI.

Funding for this purchase is from the Community Based Jobs Training grant from the United States Department of Labor.

July 21<sup>th</sup> 2008

To: President Beck and the College of Southern Idaho Board of Trustees

From: Jeffrey M. Harmon 

Re: Sprinter Passenger Vans

We received three bids for the twelve passenger Sprinter Vans. The bids are as follows:

McCoy Freightliner of Portland	\$52,650	quantity two	\$105,300
Intermountain Coach Leasing, Inc.	\$53,119	quantity two	\$106,238
Hinckley Dodge	Does not meet bid specification		

Based on the review of the bid by President Beck, I recommend that we accept the low bid that meets specification from McCoy Freightliner of Portland, Oregon in the amount of \$105,300 for two Sprinter twelve passenger extended vans.

Funding for this purchase is the Plant Facilities Fund.

# PROUD TO BE PART OF THE CSI FAMILY

## SOUTH CENTRAL HEAD START

### Ongoing Child Assessment

- The Child Observation Record (COR) is our programs ongoing assessment developed from the High/Scope Curriculum
- It is done 3 times per year along with a child's work folder
- It is made up of 32 items in 6 categories
- A family report is provided to parents 2 times a year to show the progress of their child
- Child goals are developed at the beginning of the year and are supported both at home and at school

Below are 4 areas under the 8 Domains of the Head Start Federal Outcomes

### ***Comparison Summary for Head Start Data***

<u>Category</u>	<u>Period 1-Period 2</u>	<u>Period 2-Period 3</u>	<u>Period 1-Period 3</u>
Mathematics	0.71	0.45	1.16
Identifies at least 10 letters of the alphabet, especially those in their names	0.75	0.75	1.49
Physical Health and Development	0.65	0.49	1.14
Social and Emotional Development	0.66	0.43	1.09

Children showed gains in all 8 domains of the Head Start Outcomes from Period 1 to Period 3 (Language Development, Literacy, Mathematics, Science, Creative Arts, Social/Emotional Development, Approaches to Learning, and Physical Health and Development).

**IN THE SENATE**

**RESOLUTION #1**

**BY THE ASCSI SENATE**

**2008**

**TO THE ADMINISTRATION AND BOARD OF TRUSTEES OF THE COLLEGE OF SOUTHERN IDAHO REGARDING THE COLLEGE OF SOUTHERN IDAHO SMOKING POLICY:**

**WHEREAS**, in a survey conducted by the ASCSI Senate and the Magic Valley Tobacco Free Coalition, 960 respondents representing all stakeholders of the institution supported the creation of a smoke free environment by a 79% supermajority; and

**WHEREAS**, 79% of the 960 respondents also indicated that they wanted CSI to do more to limit their exposure to second hand smoke; and

**WHEREAS**, over 110 colleges and universities nationwide have adopted smoke free policies and CSI could set the example for the creation of a healthy, smoke free, public campus in Idaho, and

**WHEREAS**, CSI is promoting a healthy lifestyle and environment, the effects of second hand smoke and the accompanying litter run contrary to that purpose; and,

**WHEREAS**, the College and South Central Public Health District will offer free classes, activities, and incentives to support the efforts of individuals to quit smoking,

**NOW, THEREFORE BE IT RESOLVED BY THE ASCSI SENATE, ACTING AS REPRESENTATIVES OF CURRENT AND FUTURE STUDENTS OF THE COLLEGE OF SOUTHERN IDAHO, THAT WE RECOMMEND TO THE ADMINISTRATION AND THE BOARD OF TRUSTEES THAT THE COLLEGE OF SOUTHERN IDAHO BECOME A SMOKE FREE ENVIRONMENT AS OF AUGUST 25, 2008.**

Full Response

- |   |  |
|---|--|
| <p>1. yes please.... this is a big problem!</p> <p>Smoke free to a point. Keep the cigarettes across in the parking lot could be a rule. Meaning in your car, or cross the street so far enough away from the buildings you aren't bringing the smoke in with you. You'd have to walk a ways to "air out". This is what i try to do at least for my other classmates, but they still smell cigarettes on me. I usually try to wait until after class, because i do feel bad they have to smell it at all; second hand smoke sticks to clothes for hours, a horrible gift for everyone that smoker comes into contact with.</p> <p>As a former smoker I understand how difficult it is to quit, but I feel that the college should be taking a leadership role in keeping students, employees, and community members healthy. There is ample evidence on the dangers of second-hand smoking. Having a smoke-free campus would send the right message and would be very appropriate for an educational institution.</p> <p>Because I am a former smoker, I consider myself sensitive to the smells of cigarettes. However, I haven't noticed a problem with smokers on campus. The few I've seen are considerate of non-smokers and don't seem to pose a problem.</p> <p>students stand a couple feet outside the doors of the library and other buildings. even being a former smoker I cant handle walking past a cloud of smoke. I would fully support a smoke free campus!</p> <p>If you get rid of the smoking on campous where are the smoking students, teachers, and workers go? There isnt enough time in between classes for them to find a designated smoking section. They aren't smoking in the building, so I dont see what the problem is? I think if you took away the smoking rights of theses people, there will be hell to pay. I dont even smoke, but I know that this is wrong.</p> <p>No matter the current restrictions there are many places on campus that as you enter or leave the building the second-hand smoke is unavoidable. I feel that the rights of those of us who do not smoke are not being protected with the current policy! The harmful effects of second-hand smoke are well documented. Please press forward with a smoke-free campus!!!</p> <p>I don't feel that CSI has enough smokers that light up together to make a big enough cloud of smoke to bother many people. I feel that the rule of being 20 feet from the building is great. One thing that I do think would be a useful addition to the campus is smoke shacks like they had at the hospital. This will give a more define area for smokers to see and use.</p> <p>CSI should be smoke free. It would do away with a lot of the litter that is seen around campus</p> <p>It would be nice to have some places to smoke that are sheltered from the weather at various points on campus. This would also in turn limit the exposure to second hand smoke for the non smokers.</p> <p>why should the rights of smokers always be denied. we are paying outragoues prices to smoke. it is our right to smoke if we want. in my opinion it is just like watching or listening to tv or radio, don't like it turn it off. but for us move away from the smoke</p> <p>I would be happy if smoking was kept from doorways and walk ways.</p> <p>A wind proof designated smoking area for each building/area would reduce second hand smoke exposure for non smokers.</p> | <p></p> <p></p> <p></p> <p></p> <p></p> <p></p> <p></p> <p></p> <p></p> <p></p> <p></p> <p></p> <p></p> |
|---|--|

14. Need better designated areas away from doorways! [VIEW](#)
15. I think it's disgusting how long smoking has gone on near the HSHS building for this long - 20 feet from the door when the wind blows is the same as standing in it!!!  
Smoking wouldnt be as much of a problem if everyone would follow the rules but EVERY time I have ever tried to go in to the library I have had to walk through the smokers to get to the building...  
16. they hover close to the doors... lets see.... where they aren't supposed to be. There is no way around it unless I choose not to test or use the library. Many say they have a right to do as they please .. but in doing so It takes away my right or ability to choose smoke free air. [VIEW](#)
17. I believe that at a learning institution examples should be set. Prohibiting smoking is a great example because it shows that the college does not permit the pollution cigarette cause, and the health risks they present. [VIEW](#)
18. CSI CAMPUS SHOULD BY SMOKE-FREE. OR AT LEAST 50 OR MORE FEET AWAY FORM BUILDINGS. [VIEW](#)
19. I do not think that it is a problem, I rarely see someone smokeBut maybe if people only smoked in parking areas and beyond, then other non smokers may not complain so much because they wouldn't have to pass it. [VIEW](#)
20. Walking through the smoke haze outside the south entrances to the Shields building is almost too much to take sometimes! I'm not sure I'm ready for the wind to stop...it's the only thing to dissipate the gray cloud. [VIEW](#)
21. Policing the 20 feet rule is all that matters to me. I see plenty of smokers standing outside. But often times they get too close to the building entrances. [VIEW](#)
22. It's very disrespectful when students are entering the buildings and they need to walk threw a cloud of smoke. [VIEW](#)
23. Though there is a limit on how close a smoker is to be to a building, they don't always follow those rules. And even if those who do are away from the building, they are still close enough that there is a haze of smoke that you must walk though to get into a building or leaving a building. [VIEW](#)
24. I think it is a great idea [VIEW](#)
25. I think smoking on campus is a huge issue. I hate walking out of any of the buildings and being surrounded by a cloud of smoke. I think its very detrimental to everyone's health and I would definitely support a smoke-free campus. [VIEW](#)
26. So, I hate it everytime I go onto the b-e-a-utiful CSI Campus, and have to start hacking because of someones second-hand smoke. Second hand smoke makes me gag, and I am pretty sure I'm allergic. It's not only me, if you don't smoke, and even if you do, you know that smoking is gross and it smells bad!!! The whole Twin Falls Community needs to support this Smoke-Free CSI thingyma-boby-doody!!!! [VIEW](#)
27. smoking is legal and by saying a smoker can not smoke is stepping ont there freedom of choice. By moving the smokers away from the door areas should be enough to satisfy nonsmokers. Until smoking is made illegal there should be no ban on the csi campus. [VIEW](#)
28. I would support a smoke-free campus because I don't like the litter associated with smoking. I also hate entering the library through the cloud of smoke because there is always a crowd outside smoking and dropping the cigarette butts on the sidewalk. BAN SMOKING!!! YEA!!!! [VIEW](#)
29. I don't personnaly smoke, but I believe that allowing people to smoke on campus isn't a problem. I do feel however that security should have more authority to enforce the ban on smoking within twenty feet of the entrances; after some of them learn to quit lighting up inside and walking out with it themselves. [VIEW](#)
30. I don't like the fact how smokers tend to smoke in front of the doors to buildings. It is horrible to pass through an area of smoke knowing that is causing great damage to my lungs. I want to live a long life without smoke exposure to my body especially my lungs. It is just gross how smoke smells and especially how the smell sticks with the smoker. I have a friend who smokes and I don't like the smell, I hope she would quit because she has become an addict to them and it has become a bad habit of having one every so minutes. [VIEW](#)
31. It's very frustrating to have to walk through a cloud of smoke, and a group of people to enter buildings around campus. I've especially seen it as a problem near the Shields building, and the Library. I believe that smokers are to stay 20 feet away from the doors, but that doesn't happen, and isn't enforced. I have witnessed CSI employees smoking at the back door of the Taylor building on many occasions. I understand that people have the right to smoke, if they choose, but the areas should be better designated, maybe with permanent fixtures that are immovable, like ashtrays and benches and enforced by security, faculty, and staff. [VIEW](#)

32. I am a smoker and out of courtesy to others I go to my vehical. Just like any other business there is an allowed perimeter around the building. CSI is a business and people pay to attend they should not have to be subjected to smoke when they walk out a door after class or into a cloud of smoke before class. I feel it should not be allowed on the campus itself but in the parking lot. Many people smoke infront of the doors especially at the sheilds building OR JUST MAKE CERTAIN DESIGNATED SMOKING AREAS FOR SMOKERS LIKE THE HOSPITAL HAS.. BUT ABSOLUTELY NO SMOKING INFRONT OF BUILDINGS.... I HOPE THIS HELPS 
33. It is offensive to have to wade through the smokers at the Aspen building and the Library in particular when headed in. They stand as close to the doors as possible and on both sides of the side walk to there is no way to avoid inhaling that stinky smell. CSI should be a smoke free campus in my opinion. 
34. Banning smoking on campus alienates people when the idea of college should be about freedom of expression away from the suppression of the outside world. 
35. It is not fair to walk by a person smoking outside a building and having your hair and clothes smell like smoke the rest of the day. 
36. The walkway at the Meyerhoffer building is one of the worst areas for second hand smoke. Regardless of the 20' distance from doorways, one still has to walk right through the cloud of smoke to get to the building doorway. BSU is a non-smoking campus and the students on our campus who make the choice to smoke should do so across the street or in one limited area away from the buildings. 
37. I HATE it when I walk into a building for class and have to walk through a cloud of smoke. It is impossible to avoid, and they smoke right next to the entrances. 
38. So far, I have never had a problem with someone being inconsiderate to me with their smoking. They have always been away from the entrances and I have never seen used cigarette butts left around. I think for the most part that smokers are more aware than before how they can affect others around them. 
39. If the state prison can be smoke-free, then so can CSI. If you really have to have a smoking location on campus, then you should require the location be on the outside of the circle drive. That would limit smoking to the parking areas (people could use their cars) or you could have an overhead heated shelter structure where smoking is limited to. CSI is doing too many things to promote good health. Move the smoke and second smoke outside the circle. 
40. Thank you for addressing this preventable health hazard. 
41. I get really tired of having smoke blown in my face when I walk into and out of school buildings. If other people want to smoke that's fine but it's not okay that it's getting into MY LUNGS when I consciously choose not to put it there! Sure there's signs up saying you can't do it within so many feet of an entrance but who stops them? Not to mention in winter its even worse because people huddle up in the doorways. It can even be bad just walking several feet behind someone who is smoking although I doubt much can be done about that. But please try harder to enforce no smoking infront of enterences I'd really appreciate so would my unborn baby :) 
42. smoking on campus affects all of of the community even the high school student because we do a lot of things on comas 
43. I don't mind that people smoke but when they cannot comply with the restrictions already maybe they should have to go else where altogether. 
44. I think,smoking on campus makes our school look ten times more trashy. Smoking is to the point where everyone knows it's gross and that it harms. I think it should be totally elliminated on campus. 
45. The fact that students have to walk through a cloud of smoke to get into any CSI building is atrocious. I have actually caught myself holding my breathe as I leave the Matrix and library as I walk outside. Head over to library entrance and look at the amount of cigarette butts littering the grounds - the whole area smells like a bar - horrible. If state buildings and hospitals are willing to go smoke free, shouldn't CSI be allowing the same health benefits for their students? Please go smoke free before the fall semester. 
46. I always see people outside smoking in areas around the campus. I feel that the designated areas suite the needs for both nonsmokers and smokers. However, there are times that I think the smoking near the enterances of the library should be moved away from the building, namely on the east side enterance. People congregate there to smoke and those of us who choose not to have walk through them and their smoke to go inside the library. I think that they possibly smoke there as the building serves as a shelter from the weather. Perhaps, the college could build "smoke stations" for the students and instructors who do smoke, like those at the hospital. Their smoking shelters provide protection from the elements and a place to sit. In all, I myself, quit smoking a long time ago and 

find others smoke repulsive. And I feel that other non-smokers should not have to be subjected to their habit. However, on the other hand, we should not alienate them because they do smoke. I would support providing such structures for their use.

47. Let it be. It's college. Just be shure to have proper butt disposal units for smokers. [VIEW](#)

48. Those people who smoke should have the right to smoke whenever. However, the college needs to improve on limiting secondhand smoke. It's almost like an ashtray when walking into the front entrance of the library. In my opinion they are a little too close to the entrance. [VIEW](#)

49. Smoke free, but not smokeless tobacco free. [VIEW](#)

50. When smokers gather around the doors to a building and smoke and I have to walk through them to get into or out of the building - that is annoying. [VIEW](#)

51. I hate walking into a building and getting a big lung full of someone elses 2nd hand smoke as I pass. I work at the hospital and we became a smoke free campus on Jan 1st 2008 and it has been so much better around the grounds. Getting rid of the smoking helps keep campus looking great and protects those of us who don't smoke from the 2nd hand of other smokers. It also encourages better health to those who do smoke. Lots of employees have quit smoking since the ban at St. Lukes. I will fully support a smoke-free Campus. I think it's time to do something about it! [VIEW](#)

52. I hate smokers that sit outside of the building entrances like its ok since they are outside...I don't want second hand smoke floating around everywhere...And it promotes an unhealthy look for the CSI campus as a whole when many campuses are probably smoke free areas all together. [VIEW](#)

53. I really get upset when I'm headed to a building to go to class and I have to walk past someone who is smoking and the wind is carrying the smoke right in front of the door where I have to go inside. I storngly feel that smokers should not be allowed to smoke within 50 feet of the doors to the buildings. [VIEW](#)

54. CSI started to restrict smoking within so many feet of the doors, but no one enforces it, so people still do it. You have to walk through a wall of smoke to get into the building. If they want to smoke fine, make them a smoke shack, and let the rest of us not have to be in it all the time. [VIEW](#)

55. It's really nasty and needs to stop ecsppecially smoking in front of building entracnes. A person has to walk through the wall of smoke to enter the building and it's not the best for my lungs. [VIEW](#)

56. Smoking shouldn't be an issue on campus. [VIEW](#)

57. Thank You for considering making CSI a smoke Free campus [VIEW](#)

58. smoking is very disturbing to me. I do not at all like being exposed to the second-hand smoke of others. If they want to kill themselves that's their thing, but I don't want any part of it. [VIEW](#)

59. there is no such thing as safe levels of secondary smoke. My father who NEVER smoked died of lung cancer because of exposure to second hand smoke in the work place. He was 46 years old.... People who smoke are well aware of the risks they are taking with their own lives... we have rights as non smokers to choose to never be exposed to such poisons. I'm tired of holding my breath as I walk out of the library through a cloud of second hand smoke to get to my next class. [VIEW](#)

60. I don't smoke and being around it does not really bother me. I don't notice that it is a problem around campus [VIEW](#)

61. It does get a little nerving walking through the plume of smelly smoke to get in to the doors on the way to class. Maybe make smoking shelters away from the buildings, like open benches but with a roof and ashtrays. Anything to move it away from those who choose not to partake in the habit. [VIEW](#)

62. People should be free to smoke cigarettes as it is not illegal. The problem comes with taking away people's rights, then where does it end? No cellphones on campus? No consumption of high fat foods? No one is going to get cancer from walking past someone that is smoking. Let's not be ridiculous. The campus should create smoker's outposts,give them an ashtray and cover from the elements and place it somewhere where there isn't a lot of traffic. If you don't want people to smoke. Lobby to make it illegal. [VIEW](#)

63. I know that some people may feel the need to smoke often. I just wish they would do it if front of all the buildings. I can hardly ever go into the Library or Shields building without walking through a bunch of smoke. I don't like to have to breath that since I choose not to smoke. They smoke in front of the doors so there isn't really a way to get in without going through the smoke. Maybe there should be a designated smoking area for each building distinctly away from the doors. Also, if there are going to be rules about it, they need to be inforced!! [VIEW](#)

64. I have only just recently quit smoking, and I don't like to be around it anymore. But I don't see a problem with students smoking outside. They are not supossed to smoke within 20 feet of the doors and windows already. The only thing that bothers me is the butts all over the ground. I never threw [VIEW](#)

- mine on the ground, and I don't know how others could be so inconsiderate. It looks bad. That is the only reason I could see to make the entire campus smoke-free.
65. i think smokers should have somewhere to smoke a(smoke house) or either at the parking lots, but not in front of buildings like it is in library... [VIEW](#)
66. I have noticed only a few students/teachers/maintaince smoke near the doors. As a general rule there has not been a problem that I have noticed. [VIEW](#)
67. I think not only smoking should be controlled, but also the use of chewing tobbaoco. I see many people walking around spitting into cups. [VIEW](#)
68. Personally, I have asthma and everytime that I walk out of a building and someone is smoking, I have severe adverse reactions. I have to look out all doors and make sure someone is not smoking before I go out of them. And if someone is, I have to find another exit. It is very inconvenient. I feel that people should have the freedom to smoke, if that is their choice, but there could be an assigned area where people could smoke, and not right infront of enterances and exits to buildings. [VIEW](#)
69. The truth is that I can not remember a time that I was bothered by someone smoking on campus. In fact I can't remember ever seeing anyone smoking on campus but I still would support making campus a smoke free zone. [VIEW](#)
70. I honestly don't think that, any of the students think about others when they smoke on campus. The rule about smoking 20ft away from the doors, no body does that! [VIEW](#)
71. I am allergic to the smoke so anything you can do to dominish it on campus would be greatly appreciated. [VIEW](#)
72. to many people smoke right outside the doors. They don't follow the rules with the code so i believe they should have their rights taken away with smoking on campus. Thats the last thing i want to smell walking into a building before class is a big puff of smoke. [VIEW](#)
73. A smoke-free campus would be terrific! [VIEW](#)
74. It's frustrating to have to walk through clouds of smoke to get to the shields building or to the library especially... Maybe a designated smoking zone away from the high-traffic areas would be nice. :) [VIEW](#)
75. If not completely smoke free then something needs to be done in the places where people are allowed to smoke. [VIEW](#)
76. It's a joke to see people outside the allied health building smoking, and blowing it right in the face of everyone walking by. CSI is definetly behind the times by allowing people to smoke on campus. [VIEW](#)
77. I think it is un fair to the ones that don't smoke and have to put up with it. And if you say something to the smokers in passing, like would you please smoke further away from the building then they start talking like a smart ass. They don't care and tell you to mind your our business. My lungs are my business and I care about my health...Please do something about... [VIEW](#)
78. yeah, we are behind the times on not having a smoke free campus. [VIEW](#)
79. Second hand smoke is harmful so I do not think ANYONE should have to be exposed to it! [VIEW](#)
80. Although I hate breathing a huge thing of second hand smoke when I am about to enter a building I don't think that it would be right to take away other people's right to smoke. I would support seperate "smoking huts" before I would support a smoke free campus. [VIEW](#)
81. I think that a smoke area should be made like at some hospitals its out by the parking lot in an enclosed glass area. It is very bothering to come out of the building after completeing a class or going into the building for class and someone is sitting in the window seal smoking next to the entry way and you have to walk through the cloud of smoke just to get where you are going. It would be nice to have better control over this. [VIEW](#)
82. I hate having to walk through smokers on campus. [VIEW](#)
83. I get tired of smoking as I walk into a building-if I wanted to smoke I would light my own. I don't want to stink because I had to walk through the puffs of someone else! [VIEW](#)
84. I find it very disgusting that cigarette butts are left on sidewalks. And the people who smoke outside are closer than the twenty feet requirement. [VIEW](#)
85. I hate walking out of buildings and having to walk through smoke right outside the doors. There needs to be smoking areas that are farther away from entrances. It is actually a violation of Idaho Law to have smoking that close to entrances/exits of buildings. Smoking laws need to be enforced for the protection of those of us who do not smoke but have to deal with second hand smoke, which is even more dangerous. [VIEW](#)

86. I believe that in this day and age and given the stapes already taken by St Lukes, that is would be very appropriate for CSI to go smoke free and take a step in the right dirrection for making the student body healthier. [view](#)

87. I am a smoker, but I try to be courteous to those who do not smoke, so I try to stay away off in my own little area when I smoke. I think a lot of other people aren't that courteous, so maybe some rules should be put into place and more tightly enforced. I don't think smoke-free would be a good idea. Maybe there should be some designated smoking areas, and if the non-smokers go over there, then it is their own fault. [view](#)

88. I think CSI would be a more friendly and beautiful place if it was smoke free if someone chooses to smoke they should have to do it off campus. I hate walking out of a building and being bombarded with the smoke of someone smoking or a butt of a cigarette left. [view](#)

89. I do not think that it bothers people as long as the smokers do it away from building entrances or away from the main walk ways. That is what I do. I think that if you are going to make it a smoke free campus you should at least have a designated smoking area. I always take others into consideration when I smoke on campus, but I realize that not everyone else does the same. [view](#)

90. It does not bother me. [view](#)

91. Far too often walking in and out of the buildings- especially the library, I have to hold my breath due to smoking. It's a disgusting habit that I chose to refrain from. Others' choice to smoke shouldn't infringe on my choice to be smoke free. If campus would to still allow smoking, 20 feet isn't near far enough away for those who enjoying being outside and the FRESH air. [view](#)

92. Yes I am a smoker and I think that if smoking were only allowed in area's, or not at all, you would be helping us all in a huge way. I am 27, I had the first puff at age 7. It is one sick friggin' joke to think it was only about money to someone else. I really hope you can make a change for the better here at C.S.I. It is a great college [view](#)

93. Sure the smokers will whine but they don't care about others they litter the ground with butts and its unhealthy and makes our campus look trashy! [view](#)

94. There are smokeing places outside not inside. [view](#)

All of the smoking on campus is done outdoors, and most are courteous enough to stay away from immediately in front of the entrances, although there are some rude people who do go into restricted space to smoke. My questions that follow, only to produce food for thought, are these:

Are we more concerned about the health of all students, or just promoting and imposing the social, ethical and moral agenda of some students on others in the name of a cause? If we ban or further restrict smoking on campus, then should we not also consider banning motor vehicles on campus too? I am sure we have some qualified scientific minds on campus that could accurately estimate the total number of harmful toxins being released by vehicle exhaust of most all students who enter the area of campus in relation to the amount of cigarette smoke being put forth by the minority of active smokers on campus. Which hazard does the student senate and Tobacco-Free Student Coalition feel is more harmful overall to the beautiful trees and landscaping of the campus? How about which one, cigarettes or vehicle exhaust, causes the largest overall threat to air quality on campus. Surely the several hundred smokers on campus cannot be having as large an impact on our health and environment as the thousands of cars and trucks that enter the campus every day.

95. How about the chemicals that are used to clean the facilities on campus? Are they completely lacking any immediate or long lasting potential for harm to students or faculty? (I am actually guessing that the college does use some "Green" products for these purposes). Does the college use lawn and garden equipment that doesn't produce harmful emissions? What about the trucks from the grounds crews? Are the fertilizer, insecticides and herbicides used to keep our campus beautiful posing absolutely no threat to human health? [view](#)

Do the Eagle's Nest and cafeteria serve food that is all natural and void of any nitrates, preservatives or other potentially harmful chemicals? Caffeine has been proven to cause cardiac problems in some people, especially with excessive and prolonged use. Should we also consider removing any items with caffeine in them from campus? (You get rid of my regular Latte's and I will throw a tantrum like a 4 year old!) What do they clean their kitchens with? Any ozone wrecking bleach in those chemicals? Where do the kitchens vent their exhaust to? Outside I am guessing, and it is potentially filled with carbon monoxide from natural gas fired grills and ovens, grease, and other impurities that are not fully filtered before being unleashed on the outside air that all students on the campus area are subjected to.

Since the sun has been proven to cause skin cancer, should we impose a rule on campus that requires students to wear clothing that completely covers their skin? Better yet, maybe we can get the college and the Alumni Association to pitch in to buy a dome to cover the campus that will keep

out sunlight. O.K., that one is extreme and kind of ludicrous, but are you starting to get my point?

If we are considering banning smoking on campus, then can we also consider an equally annoying yet less hazardous problem of cell phones? Most students aren't courteous enough to turn them off in classrooms or hallways, nor are they courteous enough not to carry on a loud conversation or spend half of the class period sending and receiving text messages. Recent studies that are being published claim that the signals from cell phones are not only harmful to the user of the cellphones, but persons around those users. They may not be harmful, but they sure are distracting and annoying.

Thanks for letting me put in my two cents on the issue. I hope you can see that this rant is not meant to question the intelligence, integrity or good intentions of the student senate or the Tobacco-Free Student Coalition. In fact, it is good to know we have a handful of dedicated people that want to improve the quality of life and conditions on our fine campus. I am merely asking all involved to look at the big picture when further considering this subject, and I trust that all of you will. Keep up the fine work, and thanks for giving the student body a platform to voice their opinions and views.

Go Golden Eagles!

96. Smokers have rights too. As long as there are designated areas for smoking I don't see it as a problem. No non-smoker wants to breathe in second hand smoke but smokers should still be allowed to smoke somewhere. Most people spend a lot of time on campus and if they had to actually leave every time they wanted to smoke it would be a little inconvenient for them. [VIEW](#)
97. I THINK THAT IF THE SMOKERS WOULD NOT SMOKE SO CLOSE TO THE BULIDINGS THEN IT WOULD BE BETTER FOR THE SCHOOL, AND ITS NON SMOKING STUDENTS( ESPECIALLY THE STUDENTS WITH HEALTH PLOBLEMS) [VIEW](#)
98. If smoking continues on campus there should be more ashtrays available. I hate seeing all the cigarette butts in the grass and on the sidewalk. For some reason the Falls Ave side of the shields building is the WORST!!!! [VIEW](#)
99. people need to smoke farther away from buildings. build a place where people can smoke away from the main buildings that has benches and ash trays. i believe that people have the right to clean air, however smoking is not illegal and smokers should be allowed to smoke outside somewhere that does not interfere with other people [VIEW](#)
100. I think it would be best if CSI were a non smoking campus. When I bring my son over to the campus we walk through second hand smoke and it's not right to subject him to that (it's the only way into the building). Going into the library under cover where smokers are is gross, I can't stand the smell. [VIEW](#)
101. Other than the occasional passing by, non-smokers aren't subject to enough second-hand smoke to cause harm. Smoking is a fairly stationary activity, I don't see too many people walking around with a cigarette in hand. That said, unless you are standing right next to someone who is smoking you aren't in the way of too much and if you are just standing there, if you get lung cancer its your own fault. [VIEW](#)
102. The outside area is huge! If someone doesn't want to be around smoking then they can walk away. Everyone should have the right to be happy and content; especially when they are paying to be there. [VIEW](#)
103. I do not feel that people are respectful of the current smoking policy. I would prefer not to have smoke puffed in my face as I make my way to class. This is a beautiful campus, and is a great place for a student to walk and relax between classes. I feel that the smoking detracts from the beauty and the whole experience here. Thank you [VIEW](#)
104. Do not stop at smoking. stop chewing tobacco also. Lets have a tobacco FREE campus. [VIEW](#)
105. Maybe mark sections of campus where smoking is permitted. Smoking other than in the designated areas would be a fineable offense. [VIEW](#)
106. It has been talked about a great deal to make CSI a smoke-free campus, and the time for talking is over. Please make the campus a smoke-free environment. What is the problem? Everyone knows that smoking and even second-hand smoke is harmful to health. Please stop talking about it and do the right thing! [VIEW](#)
107. In regards to question #8 the only problem that I see is the butts they leave every where. [VIEW](#)
108. Banning smoking is facist [VIEW](#)

109. while I'm trying to walk to my classes all I smell is smoke. It's like it has stained the air. I can understand that many people have the habit but I can hardly stand being around the smell. [VIEW](#)
110. I Feel like most people that smoke here on campus are pretty considerate but when i see a pregnant women smoking on campus i get pretty upset and i dont want to see it- more ash trays would be a good idea. [VIEW](#)
111. Absolutely Cigarettes kill - smokers & second-hand smoke victims [VIEW](#)
112. I would like to see a smoke-free on CSI campus. I would like to breath clean air ,on campus. [VIEW](#)
113. I don't smoke and the campus should be smoke free campus since smoking is a danger to everyones health including the smoker [VIEW](#)
114. I enjoy living in a democratic society. This includes where I go to school. I do not appreciate people trying to make decisions for others. Especially social ones such as this. Put your focus on other things. This is sad. [VIEW](#)
115. smoking by the enterences is rude and inconciterite [VIEW](#)
116. Walking anywhere on campus I always get hit with smoke in the face. I hate it and many others do as well. [VIEW](#)
117. If people want to smoke, let them. It's a free country; people are usually really considerate when they do smoke. So let them. [VIEW](#)
118. The smokers on Campus tend to be understandable. I have never ran into anyone who doesn't smoke where there isn't much traffic. Maybe designated smoking areas would benefit campus, but I have never ran into anyone that is inconsiderate. [VIEW](#)
119. i like that we have a 20-foot rule for smokers, but 20 feet isnt that far, and not a lot of smokers fallow that rule anyway. i wish we had some sort of consequence for smokers who smoke so close to the buildings.... I want a smoke free campus! Yeah-Whoo! [VIEW](#)
120. Results of smoking affects all the community in many ways. We cannot always see but working within the county government I have seen the high cost of medical treatment due smoking. Plus why encourage a habit that will affect us all some way or another. I presume the high cost of fire insurance would probable go down if you had a non-smoking campus. This money could be utilized in other areas to benefit the college. Thank you and have a great day. [VIEW](#)
121. I am extremely tired of always walking through a group of smokers, who are smoking, just to get to the door of the buildings!! And when I come out I have to walk through them again!! The worst place for this is the North/east door to the library!! I would support a smoke free campus 100%. [VIEW](#)
122. I don't like all the smoke at CSI, especially outside the buildings. People stand right outside the doors to the buildings and smoke so to get in or out the door we have to right through all the smoke. It is very annoying. I wish they would smoke farther away from the buildings or not smoke at all on the campus. [VIEW](#)
123. No smoking on campus period. It takes away from the beauty of the campus. NO SMOKING. [VIEW](#)
124. It is a huge problem. No one obeys the 20 feet away from the door rules, and I think it is a huge disturbance. [VIEW](#)
125. We are all adults on campus, I am a smoker I don't do it around non-smokers and I don't plan to go off of campus to have a smoke. I don't think that smoking will be banned very long if it is put into effect, most smokers will not stop anyway and I feel like this is more of a waste of time. [VIEW](#)
126. Let them smoke in the designated areas and leave them alone. This is rediculous. [VIEW](#)
127. I don not believe that CSI should completely ban smoking on campus but i feel that there should be designated smoking areas away from the buildings. It is very irritating when i enter one of the buildings and there is someone standing right next to the door smoking because they do not want to be late for class but they need Cigarette. [VIEW](#)
128. from my experience at CSI, the current guidelines for smoking on campus are never followed. i think CSI needs to do away with smoking all together. [VIEW](#)
129. Even though there are signs on all the buildings that say smoking is prohibited within twenty feet there are still people who stand right outside the doors and smoke away. I find it especially bad at the library were there is outdoor cover to stand under, I try to hold my breath long enough to get through the door to avoid the two or three smokers that seem be perpetually standing there. I think it would be great if CSI became a smoke-free campus. [VIEW](#)

- 130. I definitely agree with the smoke-free campus. It would be healthier for everyone involved. [VIEW](#)
- 131. It's just so nice to walk outside the building and into a rather unappealing cloud of smoke. College is to get smarter. Not Dead. [VIEW](#)
- 132. I don't have a problem with the few smokers there are on campus. They pay enough money in taxes that we all profit from. [VIEW](#)
- 133. I am tired of trying to enter a building for class and a group of people out front smoking and I have to walk through their haze. We wouldn't put up with people who chew to spit their chew on us, so why do we put up with having to smell others smoke that is a threat to our health due to their second hand smoke? [VIEW](#)
- 134. I have seen smoking rob people of their money and youth. Now children are being exposed at home, its being linked to asmtha and a rash i have seen on children from a smoking families. Yes, its worth taking a stand for here at CSI and for their families. [VIEW](#)
- 135. I detest walking out of a building and into billowing smoke. CSI needs to enforce current rules prohibiting smoking within a certain distance of campus buildings. [VIEW](#)
- 136. I think school campuses being smoke free is very positive. It sends a message to young adolescence to not pick up the habit. Why is it acceptable on college campuses? Don't we want to send the same message to those young adults transitioning from high school to college? With the life change of becoming an independent adult, don't we want to support good choices, like no smoking? On another note, being a non-smoker I think those that choose to smoke should find somewhere to smoke that doesn't expose those who don't smoke to second hand smoke. We make the choice to not smoke, but by allowing them to smoke where they please takes away our decision not to, by exposing us to their smoke. [VIEW](#)
- 137. The smokers should be allowed to have a designated location to smoke, but too many of them continue to smoke right next to the buildings where students walk to and from class. It gets really annoying that we all have to be a part of a choice they have made for themselves. I chose to be smoke free and they should respect my rights as a non-smoker. [VIEW](#)
- 138. I would support a smoking or a non-smoking campus. Though an unhealthy habit, I feel as adults we have the choice to either smoke or not. I don't think it fair to tell someone they cannot smoke because it is unhealthy and allow other students to walk around with piercings in every place imaginable. I realize body piercings do not adversely affect the lungs of fellow students, but you can't cite one group as being deviant and not another. [VIEW](#)
- 139. Smoking sucks. It is a huge problem at CSI and there is enough smoking elsewhere in the world that the least people could do is not smoke right where people walk so that whenever I walk out of class, that is the first thing I breath. I absolutely hate it. I know people have a right to smoke, but not if it is hindering everyone else around them. If they want to die of the black lung, that's their thing. I would rather not inhale their death and get black lung myself. EEWW!! [VIEW](#)
- 140. I hate to walk outside and be surrounded by a cloud of smoke while walking between buildings. [VIEW](#)
- 141. I get so pissed when I walk out of classes and inhale tons of smoke. It isn't enforced on campus and just cause they want to get cancer form their cigs doesn't mean the rest of us need to get it. They have the right to do it, just shouldn't be affecting others around them with it. That INFRINGES ON MY RIGHTS! [VIEW](#)
- 142. Q: 10 "...support..." Do we have a choice? Support, as in taxes, as in attendance, as in???? What a poorly worded question. [VIEW](#)
- 143. I beleive that smoking is a choice however I do not think that it is a choice that should be made for other people. As a former smoker anytime that I even smell cigarette smoke I get a terrible headache. When I walk by ashtrashes the same thing happens. There are days that this affect plays a huge role in my ability to think and concentrate. If people want to smoke they shoudl go sit in their acrs with the windows rolled UP! and pollute their air and only hurt or kill themselves. I beleive that more should be done to control smoking on campus also the cigarette butts that are found on the ground take away from the beauty of the campus. Smokers should be ticketed and fined (if not worse) for smoking or littering on campus!!! [VIEW](#)
- 144. I think that everyone has a right to smoke as long as it doesn't infringe on upon other people. I hate walking out of buildings at CSI because instead of smelling the fresh spring air I have no choice but to inhale other people's shit. I personally think that there is no positives to smoking period. So CSI should become a smoke free campus because it will show that we are a more earth friendly campus and this will help with all of the other people who choose not to die an early death. PLEASE do something about this problem! [VIEW](#)
- 145. I have never smoked and don't think that other non-smokers like me should have to deal with the second hang smoke that we run into just going to class everyday. [VIEW](#)

146. The biggest problem I believe is when I'm walking to class and everyone is sitting in front of the doors even though they are supposed to be so many feet away from the door. They are right in front of the doors and the smoke smell travels with whoever is walking into each building. I don't think their habits should effect everyone else. [VIEW](#)
147. Being a leader in the community, CSI should set the bar and be an example by going to a smoke-free campus. [VIEW](#)
148. At my old school there were designated shelters that were made available for smokers. There were also cans available for cigarette stubs. compromises were made. [VIEW](#)
149. This is a nice gesture, but maybe you should be more concerned with weed in the dorms  
Really [VIEW](#)
150. make smokers go further away from the building [VIEW](#)
151. Smoking areas seem to be right outside the doors to the buildings, this is exposing me to second hand smoke everytime I have to walk into a building. [VIEW](#)
152. If CSI is recognized as place to learn about health care, then lets go the final step and become smoke free. I realize that smoking is a personal choice and a very difficult habit to break. [VIEW](#)
153. I hate to smell and sometime i cough when people were in class. Sometime it cause me to have a bad headache from smell bad when they smoke [VIEW](#)
154. People are going to be exposed to second smoking regardless if we make csi a smoke free campus. [VIEW](#)
155. I would like to see CSI become a smoke free campus- I personally am highly allergic to the smell of it.. So makes it very hard to go into a building when students are all around the entry way smoking.. [VIEW](#)
156. I think that smoking allowed on campus sends a bad message to the younger potential CSI students. [VIEW](#)
157. I smoke outside and believe it should be outside, but taking away personal decision for an adult is an imfraction of my rights [VIEW](#)
158. i feel there should be designated smoking areas. I dont personally enjoy walking down the sidewalk and passing through a group of smokers who are far enough away from building entrances but are still an issue to the general public. I think by limiting smoking to certain areas it would limit unwanted and unexpected second hand exposure as well as help avoid exposure to those who have sensitive senses or even medical conditions which require avoiding smoke. I dont think the smoking is a huge issue on campus but being a non-smoker every little bit helps. thanks for asking and taking time to put together this survey. [VIEW](#)
159. The signs all over say 20 feet from the building. they don't do this for the most part. It is wrong that those of us who have chosen a smoke free lifestyle for a reason have to walk through smoke to enter almost any building on campus. [VIEW](#)
160. It would be better if people wouldn't smoke by the doors. There is always a big crowd of people smoking by the library entrance. Maybe if the benches were moved away... [VIEW](#)
161. Even though smoking signs are posted outside of buildings, one has to often walk through a wall of smoke and smokers standing outside the entrances. Maybe I am more bothered by the smoke because of my allergic reaction to it, but it would be nicer if smokers could smoke out in the parking lot away from school entrances--the smell still comes into the buildings and is not a very inviting odor upon entering a building. [VIEW](#)
162. it's discusting to walk into a building when a person is standing at the door and smoking. that is a smell that i do not want to smell at all [VIEW](#)
163. Even with the 20' away from the building smoking area, you have to walk through where people are smoking to get to the building. Smokers are very rude to just toss their cigarette butts anywhere. [VIEW](#)
164. As a former smoker, I now notice te smell more than I ever did before I started. I quite a couple years ago, and since avoid the smell like the plague. The clean-air rules are never obeyed and the front of the canyon building at any given time reeks of cigarettes. I would definitely support a smoke free campus, except over by eagle hall. The students who live there should have the right to smoke outside their home, but with strictly enforced no smoking areas around the doors. [VIEW](#)
165. I AM VERY TIRED OF WALKING INTO AND OUT OF CSI BUILDINGS, INCLUDING THE GYM, AND HAVING PEOPLE SMOKING JUST OUTSIDE THE DOORS. IT DOESN'T MATTER THAT THEY OUR OUTSIDE THE BUILDING, WHEN THE WIND BLOWS THE SMOKE COMES INTO ANY OF THE BUILDINGS AND LEAVES A TERRIBLE SMELL IN THE BUILDING AND ON US. [VIEW](#)

166. As long as it is done outside or in areas that are designated for smoking then there shouldn't be a problem. [view](#)
167. I think that the smoking "rules" on campus are unenforced. Although it states that you should be 20 feet from the entrances most people do not do that. Also there is nothing that keeps people from smoking near open windows. So in the warmer months cigarette smoke can be smelled in some rooms. [view](#)
168. Unsure how to enforce a smoke-free campus, also unsure how this will impact future community relations and enrollments. [view](#)
169. i dont mind the smoke alot but if we could like make people not smoke at the doors where everyone is going in or out of the buildings that would be better. or we could just build little smoke huts around campus that they can go into and smoke. [view](#)
170. To much smoking and it kills people [view](#)
171. The smoking is especially bad by the Meyerhoffer building. Every time you walk in or out of the building you get a big whiff of smoke. I think that possibly doing areas that are contained for smoking would be a good idea. This is something Dell has done and it seems to work well. [view](#)
172. Keeping the smokers 20 feet from the doors just means you have to walk THROUGH the smoke to get to the doors. It would be very helpful if this problem, at least, could be solved. A smoke-free campus would be wonderful. [view](#)
173. Smokers have made such a mess in front of the Shields building that it has become an embarrassment. Trying to walk in the main door of the Shields building on many mornings means walking through a smelly, nasty, cancer infested haze. If restaurants can ban smoking so can CSI. [view](#)
174. Why should I have to walk into a building through a wall of smoke. There are ash trays all over but most are NEXT to the main doors Not the 20 feet required. [view](#)
175. I think smoking on campus should be prohibited because every time someone enters any building you have to walk by the smoker and you inhale second hand smoke any way. Plus, there are little kids that come to either the main campus and the other out reach campuses for different things i.e. kids college or with their parents for certain reasons or for child care. [view](#)
176. I believe it is a heavy hand and over moralizing to ban smoking from campus. In my general observation, smokers are respectful of others. Leave the choice open. It would also cost time and money to enforce such a rule. We are an open institution that must respect ind. rights. A ban would seem judgemental and I question that a religious influence would be behind such a decision, not the general welfare of others. [view](#)
- I am sick of having to walk through carcinogenic air everytime I use the library or enter the shields building. Other campuses (kansas community colleges) have eliminated smoking from campus altogether. What are we afraid of?
177. Two years ago we tried to go smoke free here at CSI. Why did senate not make it happen? Let's try again. Most students on campus do not smoke, 80% according to the last survey. People do get cancer and die from inhaling second hand smoke. Oregon is passing a law to make it illegal to smoke in a car with children. [view](#)
- Also, I hope the new hut at the entrance to campus will have signs saying that it is not intended as a smoking hut. What is senate willing to do to make this a smoke-free campus besides surveys? Talk to the board and faculty? Put posters up? Let's take a student vote!
- This is a very important health issue. No student who really cares about their health or visitor of our campus should mind that we are going smoke free. Please do something.
178. My reason for wanting a smoke-free campus is due to the fact that I have a high sensitivity to cigarette smoke, very nearly an allergic reaction. Because of scarring in my lungs due to a severe illness I had several years ago, the irritants in cigarette smoke cause me to cough involuntarily. Sometimes, large amounts of cigarette smoke cause me to cough so violently it brings up blood. I'm embarrassed by my reaction to smoke, especially when the smoker is aware of it, because I feel like those who smoke think I'm trying to send them a message. The truth is, their lifestyle choices are their own to make, but they affect me a great deal, even in the classroom. (It's difficult to concentrate on a lecture when a student brings in lingering smoke and most of my attention is redirected to just trying to breathe.) While I respect everyone's right to make their own choices, I truly hope that CSI will be able to change campus to a smoke-free one. Thank you for letting me share my voice in this matter. [view](#)

179. Well it kind of bothers me a little that the designated smoking is right outside the entrances and if someone has smoked there recently you catch a good wiff of cigarettes, especially that smoke depository. However, there aren't really any other places to move those smoke spots to. It would be nice if the campus was smoke free because cigarettes kill and this would be more motivation to quit. The hospital went smoke free not too long ago, this is a good step in the right process, I think CSI should follow.

[VIEW](#)

180. Perhaps smoking area's should be placed through out the campus.

[VIEW](#)

181. I walk over to the Library. When someone is smoking under the upper level overhang, particularly on the east, the smell is overpoweringly unpleasant. I never appreciate having to smell another persons smoke. I also often walk around the campus for exercise. I purposely avoid anyone who is smoking so I don't have to smell their smoke. It is most annoying, unpleasant, and unhealthy. I strongly encourage and support a smoke free campus.

[VIEW](#)

182. I am going to be eligible fo retirement soon. I am thinking about taking some classes at CSI after retirement. I would certainly support a smoke free campus, and would also appreciate it. It is annoying for me even outdoors to be near people who are smoking.

[VIEW](#)

183. It is not just the smoke... it is also the awful smell that lingers on the persons clothes and breath. I do not attend classes, but work at a building on campus and often have opportunity to be involved in stuff happening on campus...

[VIEW](#)

184. The smoking situation at the Library is TERRIBLE! One has to walk through a gauntlet of smokers to go in the door. I applaud the college conducting this survey and sincerely hope that the campus goes smoke-free.

[VIEW](#)

185. I feel banning smoking in buildings and within so many feet outside each building is adequate. I do not feel the whole campus needs to be smoke-free any more than any other open area. I feel we are to the point of dictating and discriminating against a specific group of people. We should continue to educate, but not dictate and discriminate. Are we going to have people weigh in before lunch and then direct them to the 'appropriate food' for their BMI? That seems equal to a smoke free campus in my mind. Eliminating smoke related illnesses from their health insurance coverage seems it would be more effective and serve everyone in decreasing the costs of smoke related health care to those of us who do not smoke.

[VIEW](#)

And, who is going to enforce such a smoking ban? Seems ineffective and discriminatory to me.

Can we paint a line to show exactly where 20 ft is at each door way

186.

[VIEW](#)

187. Unfortunately I once was a smoker and now have to use 2 different inhalers. I have been a non smoker for over ten years. My problem is, simply walking by smokers near the building can cause an asthma attack. Even if noone is there I can still smell the nastiness. I say if people absolutely have to smoke it should be at the far end of the parking lots not near the buildings at all!

[VIEW](#)

188. I think the main problem is that too many people smoke too close to the entry ways. Even though many of these people are at the designated 20 feet from the building, they stand right in the main pathway and generally the smoke makes its way back to the entryway. I think the best solution

[VIEW](#)

would be to designate a spot for smokers not so close to the main paths and a little further away from the entry ways.

- 189. As long as it stays outside and there is not too much of it, I am fine [VIEW](#)
- 190. It is very irritating when you walk of of a building only to have a group of 3-4 smokers standing by the door(closer than 20 ft.)blowing smoke at the us. One solution would be to move the smoking benches away from the front of the shields builing and actually enforce the Idaho Clean Air Act. [VIEW](#)
- 191. I am a smoker, always trying to quit. I did quit smoking on campus a year ago and it has greatly improved my efficiency at work. I completely support a smoke free campus!! [VIEW](#)
- 192. There is no need for the smokers to block the entrance to the library polluting the air for everyone that has to enter. If they want to smoke the can do it in their car or at home, but not in my face!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!! [VIEW](#)
- 193. smoking is really fucking bad for you [VIEW](#)
- 194. It is frustrating walking out of every building and having smoke blown in your face. There definitely needs to be no smoking on the campus. I reserve the right not to smoke or have it blown in my face. Those who do smoke, choose to shorten their lives, and I have chosen not to shorten mine. The smokers should have no say as to my decision and I should not have to be surrounded by the smokers of CSI. [VIEW](#)
- 195. i think that there could be designated smoking areas, like where the construction is goin on behind the Shields building... i don't like that the smoking area by the Meyerhoffer building is right next to the door, and I think that is one of the main concerns for non-smoking students and faculty.. it should be moved out to the lawn, or over to the table and bench section on the side of the building... another thing, is that at registration, little pamphlets about the rules of smoking on campus could be given out...one of the main smoking policies should be that if you smoke, then don't litter our beautiful campus with the butts... it isn't hard to put the butt in your back pocket, or carry it to the nearest trash receptical... [VIEW](#)
- 196. When people smoke around campus, they smoke right in front of the doors, so when you walk by you get this huge gust of smoke in your face. I can't stand the smell of smoke. I really makes me sick! [VIEW](#)
- 197. Ban all smoking or risk losing students. The filtering of smoke is a choice I make not to endure, so please relieve my stress and ban smoking from the campus. [VIEW](#)
- 198. I think there needs to be 50 feet from entryways instead of 20 because most people only go about 10 feet as it is, maybe if the sign says 50 they will go out to 20-30 feet instead. [VIEW](#)
- 199. Smokers need to pick up their trash and need to relize that stepping out the door isn't 50 feet. On a side note: Smokers probably cause most of the fires that are started by the freeway because they throw their lit cigarettes out the window and start the fires. [VIEW](#)
- 200. Even when I was a smoker the smell of smoke would disgust me. I never smoked in public places in fear of being judged, and I didn't feel it was fair to impose second hand smoke onto others. I only ask the same respect from people who do smoke now. [VIEW](#)
- 201. I can't stand walking to class and go through clouds of cegarette smoke and breathibg it in and also smell like it too. I take pride in my body i should not have to suffer because other don't care about their body let alone others! [VIEW](#)
- 202. Let them kill themselves and not take me with them. [VIEW](#)
- 203. i hate walking around and breathing in smoke from other people all the time and i think action should be taken. [VIEW](#)
- 204. I think that the campus should have designated areas for smokers because none of them go by the 20 foot rule they smoke right in front of the door where people have to walk in and out of. SUCH AS THE LIBRARY. since we have the clean idaho act then we reallly need to act on it cause nothing is being done to inforce it. and by having those certain areas at least 20 feet away from the buildings then no one will complain. people that want to smoke can smoke and the people that dont want to deal with it dont have to. i dont think that we will be able to make it a smoke-free campus because so many people smoke but it would be great if it was. thank you [VIEW](#)
- 205. Although I do not smoke, many do. Even though I would support a smoke free CSI campus, I believe it would deter many people who do smoke from going to the CSI campus because they would feel it is a free country. I agree with them but I do also believe that it is our right to not have to breathe in second hand smoke. [VIEW](#)
- 206. I would definitely enjoy a smoke-free campus. [VIEW](#)

207. there is a 20' limit, but i think they should have to walk out to the end of the parking lot, where there are no more cars - if they MUST smoke, then they could but they would have to walk out to the boonies to do it! [view](#)
208. I get really sick when I'm around smoke so it would definately be good if smoking was prohibited on campus or if there were a certain area for smokers to smoke... [view](#)
209. I feel that if someone wants to smoke in the open air they should be able to do so without authority hindering them. If they want to smoke that is their problem, they just shouldn't be blowing it in my face. Then we will have a problem. [view](#)
210. To take away smoking privelages from smokers would be unconstitutional. If people are worried or concerned about second-hand smoke, that's why most people walk by giving unapproving glances. For some, like me, smoking is a stress relief, and a lot of the stress is from classes and instructors. So instead of trying to ban smoking on CSI's campus, or creating designated areas, people should just do what they've always done; stare and judge. [view](#)
211. Even if they didn't demolish smoking on campus, I would appreciate them restricting the areas of smoking. When you can't even breathe as you walk in a building because of smoke, there is a problem. [view](#)
212. please consider offering a quit smoking program on the campuses. please check into Nancy Caspersen's "Quit and Live" Tobacco Cessation Program. She does on-site classes and it is very popular throughout Idaho. her website is www.QuitAndLive.net [view](#)
213. i think there should be a place where just smokers could go. [view](#)
214. If you take smoking off campus You might aswell take overeaters,sugar eaters,people that eat with open mouths,and people with different colored hair. Thats the way I feel and it sounds STUPID [view](#)
215. Being a former smoker, I now hate the smell of smoke. It is just so nasty, and people are always smokeing right by the doors to buildings, its just gross!! [view](#)
216. I really hate when I am walking to class and I get bombarded by smokers outside of every door I try to use. I am a vocal music major and the smoke is harmful to my singing voice as well as very unhealthy. I think that CSI should be s smoke free campus. It would benefit everyone. I think some people might even quit smoking because it would be too much of a hassel to go off campus to smoke between classes. [view](#)
217. People don't often honor the law that they must be 30 feet from doorways. Even if they do, it's not worth a lot if they're 30 feet from the doorway but along the pathway that everyone must take to enter or exit a building. This is especially a problem at the northern entrance of the Meyerhoeffer Building. [view](#)
218. i think that enforcing the 20ft rule or how ever far its. people smoke right outside of the doors! start with enforcing the rules that are already there! being an ex smoker you cannot stop people from smoking that will cause a huge uproar. enforce the rules already in place [view](#)
219. If there is a problem with smoking or people complaing, designate areas for smoking. Even though buildings say stay so many feet away from the buildings no does, especially when its cold outside. Try investing in smoke rooms or something like you see at airports and businesses. [view](#)
220. i dont smoke but i dont mind people smoking because if they want to they can do it i think is bad that they have to wait thought all class with out a smoke because if they are addicted they wont be able to consentrait because of there addiction [view](#)
221. none [view](#)
222. i want to smoke [view](#)
223. I think that we need to make this campus smoke-free because even though there was a no smoke within 20ft of the building entrances policy, you still have to walk by and you still inhale the smoke. Also everywhere I go I see cigarette butts on the ground. [view](#)
224. People need to stop crying about everything in life. Second hand smoke can affect people, but you can never can change the true smokers. So just leave us alone. [view](#)
225. a person should be able to smoke where ever they want outside and the policy to stay twenty feet form the door is perfect [view](#)
226. More ashtrays around might help stop the mess. But DON'T take away my stress reliever or I may not be back. [view](#)

227. I do believe that non smokers do not deserve to be unwillingly exposed to second hand smoke, but I beleive that it is descrimination of smokers to completely ban it on campus. Smoking is a serious addiction, and smokers do not deserve to be penalized because they smoke. I believe that more support for smoking cessation should be offered, and a designated "smoking area" should be established. That way, people who do smoke have somewhere to go, and those who don't can avoid the smoking area if it bothers them. College can be a stressful time in one's life, and I believe alienating smokers because they have a bad habit that maybe they don't have the strength to overcome, would discourage people who do smoke from attending. Smoking should be treated as any other addiction would be (ie., alcohol, drugs, eating disorders, etc.). Addiction is a disease, not necessarily a choice. 
228. It would be nice to have CSI offer smoking cessastion classes free to the general public. 
229. HATE HAVING TO WALK INTO THE LIBRARY WITH A LAST GASP OF SECOND HAND SMOKE WHEN I COULD BE BREATHING FRESH AIR. PLUS IT IS A CONCERN FOR PEOPLE LIKE MY SELF THAT HAVE ASTHMA! 
230. this smell and trash that come from around the smoking areas are disgusting 
231. I would like to see no more smoking right by the buildings. There are always a lot of people sitting outside the doors smoking waiting for classes.. and they just throw their ciggarette butts, it's disgusting. 
232. I support the right for people to smoke, but no one, under any circumstance should be forced to endure second-hand smoke. If a person is required to be on campus, they should not have to avoide certain areas or worry that they will be exposed to smoke. 
233. Please and thanks. 
234. I hate going to the library and before walking in i have to walk through a wall of smoke. Even though posted on the door if not to smoke with in 200 ft of the entrance. This is aggrivating to me! I feel like it is an infringement on my rights. 
235. To question #10...absolutely! I would deeply appreciate it! Thanks for being thoughtful and asking. 
236. I think that it was a great idea in 2004 to have the rule that smokers need to be at least 20 feet away the doors. There are still problems with that. People who don't smoke, like myself, don't really like to smell it. I realize that this is about of our society, but since I am also pregnant I don't want my unborn child to receive the smoke as well since I am breathing in the air. Plus people liter the ground with their cigarette butts everywhere and it's not healthy for our environment. 
237. Smoking is disgusting and everytime i pass by or enterthe building where someone is smoking i am being exposed to the deadly chemicals. Being exposed to that much well i might as weel smoke then. It smell horrible and people shouldn't be allowed to kill the rest of us just because they want to kill themselves!!! 
238. Everyday when i come to school i come with a clean smell and leave smelling like smoke. I am allergic to smoke and the rest of my day is determined by how many smokers sit next to the doors of the classes. 
239. As a non-smoker I feel that the smoking situation has gotten out of have hand. The fact that there are places to sit close to the doorways, acts as an enabler. For example, the benches outside of the Meyerhoeffer building, attracts many smokers. A person can't even walk into the building without inhaling a bunch of second hand smoke. I think that it is a shame that mine and other non-smokers health is being jeopardized. Please rule in favor of a smoke free campus. 
240. I hate having to walk down the "lane" to the library and smelling/inhaling the smoke. I shouldn't have to hold my breath. 
241. I'm going to end up getting lung cancer from all of the smokers on campus. At least enforce your own rules about not smoking by entrances. Specfically shields and, desert and fine arts buildings. 
242. I think smoking huts might help but for the most part, students, myself included, smoke on the go. I think that the smoking bench in front of the Meyerhoffer building should be moved elsewhere. Smokers should go elsewhere so that people walking into the building wouldn't have to walk through the smoke. Smoking sections should be in open areas that don't hold the smoke in. I'd like to be in a protected environment where I don't have to get wet when the weather is bad, but I don't think non-smokers should have to suffer for it. 
243. People go to college to learn, not to get cancer. 
244. There are cigar and cigarette butts strewn all over the campus grounds. The smoking areas around most of the buildings are right at the entrances, so non-smokers get subjected to the second-hand smoke just to get to and from classes, the library and other functions. 

245. I do not encounter ill-mannered smokers here at CSI. The average smoker is no different than any other average person... as long as they are courteous and aware of the comfort and safety of others, I cannot imagine why anyone would be so petty as to tell adult Americans they cannot smoke cigarettes outdoors away from others. If people wanted to start using illegal and other mind-altering substances 20 feet away from campus buildings, then I would consider others to be deservedly offended and even in danger. [VIEW](#)
246. The smokers on campus have areas they are restricted to and most of them honor that. Meanwhile, I'm more concerned about littered gum because gum chewers don't seem to be able to find garbage cans. I seldom see a butt on the ground at the college. [VIEW](#)
247. The smokers on campus often smoke right outside the doorways to get into the buildings; this happens especially in the winter time, but this is also a common occurrence during the other seasons as well. I would appreciate a clean and clear path on my way to class. [VIEW](#)
248. Do not like how the ashtrays for smokers are right in front of the doors where people who do not smoke have to walk by and breathe it. Also do not appreciate smokers standing right by entrance doors smoking. Not all of us smoke and do not wish to breathe in second hand smoke as it is more harmful than smoking [VIEW](#)
249. I do not think smoking on campus is a huge problem, but I do think that there should be smoking stations or areas where smoking is allowed. I hate walking into or out of a building and people standing by the doors are smoking and they blow smoke my way. [VIEW](#)
250. I see the 20 feet smoking signs, but then see people smoking right outside of the door. Their needs to be shaded areas 20 feet away from all buildings so that people who do smoke have somewhere to smoke comfortable but with out causing any one who don't want to breath second hand smoke. [VIEW](#)
251. I work in the library and I am always forced to walk through a cloud of cigarette fumes on my way to work. I would like for the entire entry way into the Meyer Hoeffler building to be considered the entrance to the building. [VIEW](#)
252. I really want to see smoking get very limited espically when it comes to the entrances of builds because the people that are smoking sit where the wind and the opening of the door pulls the smoke so that yo have to walk through the smoke and I am disgusted that the people do not care that they are harming the health of the people that are around them. I understand from relatives that smoke theat it is very addicitive and you have to smoke when the ugre comes, but if you are going to skome go somewhere else. The other problem that I have with smokers and smoking is that a lot of the smokers instead of using the desginated cigarette disposers they just flick their butts anywher, and on washington where I cross the street it is disgusting because there are so many buitts and I would like to see something done to reduce the amount of butts so that the enviroment will be protected. [VIEW](#)
253. Leave the smokers alone it's a big campus go somewhere else if it bothers you that bad. They have as much of a right as non-smokers. [VIEW](#)
254. On the south side of the Shields Building, many people sit against the building and smoke. I think it is a problem because they sit just around the corner from the entrance and when the wind blows, the smoke lingers just outside the entrance of the building. That makes it hard for me to breathe when I walk through there. Also at the southwest entrance to the Meyerhoeffler building, I have seen many people right beside the door smoking. [VIEW](#)
255. I think that this was a great idea. The smoking does bother me and affect my body. [VIEW](#)
256. Unfortunately, twenty feet away from the doors doesn't stop smokers from standing on or near sidewalks or next to the buildings so most of the time I'm still forced to walk through cigarette smoke. Yuk!!!! There is also a problem with students thinking that they can spit there chewing tobacco any and everywhere. [VIEW](#)
257. For too many people smoking is a huge stress release. To have to go off campus to smoke makes for more stress - it only excaberates the stress problem, leading to increased smoking rather than less. This is still a free society and it is proven that second hand smoke is not as damaging as once thought. It has more to do with perception and fact. And I smoked ro 30 years! Buried both parents because of smoking! People still need to make their own choices. [VIEW](#)
258. I study alot at the library. I do not appreciate having to walk though a "hall of cig smoke" just before the entrance ways to the library. [VIEW](#)
259. People have the right to smoke anywhere outside. As long as there is no smoking inside other students should back off the smokers. [VIEW](#)
260. i find it gross that i have to walk through everyone elses smoke when i choose not to smoke. [VIEW](#)

261. People shouldn't be allowed to just sit outside of a building to smoke, because those who don't smoke are having to walk through it and being exposed to second hand smoke. If they were just smoking in not such a popular place, like outside of the entrance to a building, if there was anything that could be done, it would reduce the risk of second hand smoke.

[VIEW](#)

262. Smoking right outside the building (in my opinion) is nearly as bad as if it were inside the building because we all have to walk through the smoke as we enter. It would be best to only allow smoking in a particular location if it's not possible to make the campus smoke-free. Exposure to second hand smoke is one of the worst forms of potential disease, cancer, and many other health problems. Those of us who choose not to smoke should not have to take those risks EVER at CSI. They are ones that could easily be avoided if we were to move the smokers away from the entryways completely. Thank you.

[VIEW](#)

263. I think that its pretty gross when I walk into the building and I have to walk through a haze of secondhand smoke. Especially since I am pregnant it is so much more important to me not to be around second-hand smoke. If smoking is going to be allowed then maybe the ashtrays can be moved to some place other than right next to the entryways.

[VIEW](#)

264. There is a ton of fresh air and i dont think that because someone doesnt smoke that people who do shouldnt be allowed to smoke. That is ridiculous! If they dont like the smell and dont like smoke walk away the campus is big enough!

[VIEW](#)

265. I HATE having to walk through a choking cloud of stinky second hand smoke in order to get to my classes. Even though there is signs posted that someone can not smoke within 20 feet of the buildings, nobody obeys it. CSI should be absolutely smoke free!!!

[VIEW](#)

266. People have a right to smoke but they really need to stay 20 feet from the doors, that would be nice. Another sad thing about the smokers is that many just leave there cig butts anywhere, they really need to find an ashtray. But if we limits people's right to smoke what next are you going to tell me I can't eat a cheese burger because two out of 3 American are obese. Where does the madness end?

[VIEW](#)

267. There is so many people suffering the second hand smoke effects, let's have a free smoking campus.

[VIEW](#)

268. second hand smoking is a unresolved issue that needs to be dealt with. Every time thatI walk out of class and out of the building there it is i inhale the disgusting fumes itis harmful to us people that dont smoke why should our health be at risk because others dont care about theirs. If they want to smoke it should be far away from he doors at the school, let them smoke in their cars, houses, ect..

[VIEW](#)

269. I am a healthy person. When i approach the library or other buildings on campus often times i am consumed by a billow of smoke. i don't smoke, i don't want to smoke, and i don't think i should have to inhale someone else's bad habit!

[VIEW](#)

270. If nothing more can be done, the school needs to be very proactive about keeping the smoke 20 feet from the building, but maybe make sure that the 20 feet is not in the walkway for the buildings.

[VIEW](#)

271. I would like to see this happen

[VIEW](#)

272. It's gross and unfair to have to walk past smokers to get into the buildings. Most of them don't do the twenty foot of a door/entrance and that's not far enough away anyway. Smoke travels more than that.

[VIEW](#)

273. beacuse is wrong

[VIEW](#)

274. hate smoking let be rid of it once and for all!

[VIEW](#)

275. I think we should all be able to walk around campus without having to smell someone else's cigarette smoke. As a prior smoker nothing makes me sicker to my stomach than smelling the cigarettes again. Some students also smoke cigars and those are very rancid.

[VIEW](#)

276. I believe the smokers were to smoke away from the doorways, if that is the cause they are very disrespectful because they light up right there by the doorways and there are always a group of them. I beleive they should not be smoking there at the main doorways, it is inconsiderate espically for those of us who suffer from asthma.

[VIEW](#)

277. I don't believe its possible to make the campus smoke free. The addiction to nicotene is to strong. instead make the smoking areas further from doors.

[VIEW](#)

278. I am not a smoker, nor do I like to be around it. However, there are many faculty and students who do smoke, and making CSI a smoke free campus would be a pain in the neck for them. Perhaps having designated smoking areas could limit the exposure of second hand smoke, though I don't know how effective that would be. I live in the dorms and I had a roommate last semester who smoked. I would go on "smoke breaks" with her, and though there was an area out back with chairs and a butt can, it was extremely cold in the winter. I would suggest having a room or heated area,

[VIEW](#)

or at least a covered place for the smokers at the dorms to go during the winter when it is cold and snowing.

- 279. I believe current non-smoking measures are appropriate. 
- 280. It is absolutely horrible around the library and matrix - and the trash! 
- 281. CSI has a beautiful Campus, I know I helped plant many of the trees in the early 70's, it should not be used as someones, anyones, ash tray even if they trash their cigarette butts and many don't, CSI should have been smoke-free many year ago, it's never too late to start. Also Second hand smoke KILLS Children, Studends, Teens and Adults. 
- 282. I think that the no smoking within 20 ft of the doors should be enough. I do not believe that a smoke free campus would be benifical and I think that it would not be fair to the smokers. Not only do we have to be 20ft from doors but it puts us out in the open weather and singles us out..... 
- 283. I support a smoke free world, however I realize that that is an unrealistic hope. I would support designated smoking areas as many businesses and factories have resorted to. I quit smoking to get away from the smoke and feel that smokers violate my right to clean air. 
- 284. I am absolutely amazed that CSI has NOT made this beautiful campus a smoke free campus already. I believe that it would set the standard for many colleges around to follow if they haven't already. Please do make this beautiful campus a smoke free campus. I hate it when I'm just going inside the door to a building, and someone has left their cigarett left lit and it fill the whole door way entrance full of smoke. I don't have to be exposed to that, and I shouldn't have to be, and if CSI would stand up and put a stop to smoking campus wide I think that you would have a lot of support with the students, and well as the community. St. Lukes did it come on so can you. 
- 285. I THINK THAT WALKING OUT OF A BUILDING INTO A CLOUD OF SMOKE IS RUDE AND DISRESPECTFUL. IF THERE WAS A SMOKE SHACK FOR THE SMOKERS TO GO TO THAT IS FAR ENOUGH AWAY THAT IT ISN'T BOTHERSOME TO PASSER BYERS, AND STILL CLOSE ENOUGH FOR THOSE WHO WANT TO GO OUT AND SMOKE WOULD BE A SENSIBLE COMPRIMISE. 
- 286. I do not agree with people smoking outside the doors of a lot of campus buildings. Why do they get to choose whether I breathe in their second hand smoke or not? I don't want to get cancer and I feel like that when they smoke where I walk in and out of buildings and even in the parking lot the take away my choice to not smoke and avoid cancer. Second hand smoke is worse then smoking yourself so why allow someone to do that to others? 
- 287. i just want to say that i don't like smoke and i hate that i have to breath it at a school. almost every time I walk towards a building there will be someone smoking right by the entrance. i will breath in what the person just blow out. 
- 288. I think it is time the smoking community be moved off the campus (staff, faculty and students). Too many smokers are ignoring the 20 foot smoker setback from the building doors particularly when it is cold outside. I work with two smokers and both of them ignore the 20 foot setback no matter what time of the year it is. They actually prop the door to the building open when they go outside to smoke, filling the work area with second hand smoke. Enough is enough. 
- 289. Personallly i dont have anything against people that smoke, but when it affects the rest of us, then i have a problem. I absolutely hate coming out of a building and inhaling in someone else's smoke. It's disgusting and disrespectful. And i dont want my clothes to carry the stench of it either. 
- 290. Before I had children I was a smoker so I understand what a hassel it is to have non-smoking areas. However, now that I am smoke free I realize how offensive and hazardous the smoke is to everyone. 
- 291. All of the smokers on the campus are curteous of those around them and i dont think that it is enough of a problem to make them leave campus to smoke, so long as they are still unable to smoke inside any buildings. 
- 292. The problem that I have mainly noticed is the smoking near the entrances of the buildings. It is difficult to walk into the buildings when people are standing near the doors smoking without having to breathe in the smoke myself. 
- 293. I think there should be designated smoking areas. The only time I really smell the smoke is when people smoke outside a building and the vents bring the smoke in. 
- 294. Everyone knows how bad smoking is. The only ones that will disagree are the smokers. No one wants to give up a drug so easily if they are hooked. Both my parents smoked. My mother smoked for 15 years and ouit when she became pregnant with me. My father never smoked around me.He recently quit. Just because someone else has a habit it shouldn't be inflicted on anyone else. Even the people who smoke know they shouldn't. Maybe the more places that refuse smoking on their property the less likely people will light up. It is a legal drug.Just because something is legal doesn't 

make it good for you.

295. I would completely support a smoke free campus!! I am sick of walking through smoke to get to the library. And when the wind is blowing the smoke comes inside the Matrix!! I think more should be done besides moving the "ash trays" the required distance from the door. It is also very distracting in calss to have the smoke smell on the person. The smell is very distracting and it makes me queesy!!! [VIEW](#)
296. I am at the Rec center on campus regularly, and it makes me sick to walk outside and smell smoke after working out. I have actually vomited because of this issue. The CSI campus is so beautiful, but allowing it to be littered with cigarette butts is just not beneficial. [VIEW](#)
297. Terrible vice [VIEW](#)
298. CSI is a college campus, while it is true that some high school students attend CSI, I believe that having areas that people can smoke at out doors is enough to balance the concerns between smokers and non-smokers. I am not a current smoker myself, but as a former smoker I would not want to remove the legal ability of those to smoke if they choose to do so. The current rules that have them smoking away from building entrances seems unobtrusive enough. If it is a problem then I would suggest limiting the areas instead of banning smoking all together. [VIEW](#)
299. Fuck you Mormons [VIEW](#)
300. it seems as though i am entering a bar when i really am entering the library [VIEW](#)
301. The current smoking standards are not followed and I would very much like to see CSI be smoke-free. I feel it would set a good example for the community, and bring awareness to this issue. [VIEW](#)
302. Even though signs say you have to be 25 feet or so away from a building, many people still ignore it. I notice the most problem right in the covered walkway of the library. Once you walk out of it and head towards the Matrix, you are sure to get caught up in cloud of smoke. And for a complete non-smoker, its the worst thing ever and you feel like you smell the rest of the day. [VIEW](#)
303. If need be make clearly designated areas for smoking. I have no idea if adamant smokers would avoid CSI, but really it is a form of segregation. One more way to keep people on opposite sides of the fence all in the name of health. Not that health isn't important. But realistically there are not enough smokers on campus to really create the necessary changes needed to actually make a difference in air quality in the area. It isn't about health it is about the stigma that comes with smoking. So, compromise and build the little shelters like they have at Mount Hood Community College in Oregon. Like the one in front of the Fine Arts building. [VIEW](#)
304. Let's get this campus smoke free. It is about time. Faculty support it. Our health is important. [VIEW](#)
305. We can smoke in our cars. [VIEW](#)
306. I am sick of the smokke. Why should healthy students have to breath it? Make CSI smoke free!! NOW!! take a survey of students, faculty, and staff. [VIEW](#)
307. please get the campus to be smoke free enviurment it will liable to kill me i am have a alurgeic to smoke- [VIEW](#)
308. I think that you all are making a mountain out of a mole hill. If someone has issues with secondhand smoke, just avoid the smokers. You could just hold your breath if you have to pass them. On top of that, making the rules more ridiculous will make more people angry than you may think. Be very careful with your decision. [VIEW](#)
309. I am not really opposed to a smoke free campus. I am a very courteous smoker and do not smoke near the building or around people. I realize that there are a lot of smokers who are not thoughtful of others. I worry more about who is going to police this issue. Who and how? What happens if someone does smoke on campus what is the punishment and how many full time people will you hire to police the issue. This really does become a bigger issue than people currently smoking. [VIEW](#)
310. its a personal choice to smoke this is america is there anything else that you would like to govern [VIEW](#)
311. I work in the Evergreen building and smoking really doesn't seem to be an issue here, at least for me. Second hand smoke really does bother me though and if it is upsetting students around campus more should be done to prevent it. No one should have to smell/breath second hand smoke. [VIEW](#)
312. do not think there is a problem [VIEW](#)
313. i would totaly suport a smoke-free campus becasue the active smoking akes all of us pasive smokin and it has the same damage in us also is pretty dislikable when you go outside a building like the library and there is people ssmoking [VIEW](#)

314. It really bothers me that I can't go into a building without walking through a cloud of smoke. I don't want to take away their right to smoke but what gives them the right to take away my freedom to live smoke free. I think that if you want to smoke then you should only be allowed to do so in your own home so that people who don't want to die of emphysema don't have to. [VIEW](#)
315. I work on campus and fully support a smoke free campus, including parking lots. [VIEW](#)
316. Every time I walk to the library, as well as other buildings, I have to walk through a haze of smoke. There are cigarette butts all over the lawn in front of the library, which cannot leave a good impression for visitors to the campus. [VIEW](#)
317. the only reason why i say no is the fact they need moved away from the building and more of them in spots where pip smoke more [VIEW](#)
318. A smoke free campus would not only provide a healthier environment for non-smokers, but it would also benefit smokers who are currently working towards being smoke free. To some extent when trying to quit smoking the saying "out of sight out of mind", can be very true and beneficial. [VIEW](#)
319. If St. Lukes can be smoke free, the college can be smoke free. I hate walking around the campus with some one else's cigarette smoke blowing in my face and into my lungs. The way they smoke in the hallway outside of the library make it impossible to get to the doors, I have to walk around because they are smoking, polluting the air, and blocking my path. If they absolutely "need" to smoke, they can go elsewhere! [VIEW](#)
320. smoking is one of the worst habits. it not only harms the smoker but also the people around them. second hand smoke is a problem and if we could eliminate that from our campus it would be a very positive change. [VIEW](#)
321. I have never smoked and do not like to be around people who are smoking. However, I have never encountered a problem with smokers on campus. They are usually far enough away from buildings that I do not notice. We do have smokers who work in our building but they have always been very courteous about exposing us to their smoke. [VIEW](#)
322. I am very uncomfortable walking through clouds of smoke as I approach building entrances. However many feet you put the butt-kits there will still be offensive and dangerous smoke. It's about time the campus was made smoke free. And don't fall for the line that enrollment will be hurt. Bars that are smoke free are doing just fine - so should the campus. [VIEW](#)
323. I would love it if CSI was a smoke free campus and really, really enforced this. Even the whole 20 ft away doesn't work because some people don't care or they are just plain stupid and don't know what 20 feet looks like. Make CSI a smoke free campus!! [VIEW](#)
324. The current regulations regarding smoking on campus does little to prevent second-hand smoke and from my personal experience is little to never enforced. Though smoking is a freedom to all so is the right to clean air and a nicely maintained campus. More and more I see cigarette butts thrown onto the lawns, into flowerbeds, and smeared on sidewalks. If smokers truly appreciated their right to smoke one would think that they would likewise act in a demeanor appropriate to maintain this right they currently have. [VIEW](#)
325. If students want to smoke and deal with the consequences that come, then fine. But I don't appreciate having to deal with problems with secondhand smoke. If they want to harm themselves, I won't stop them, but when their habit starts to harm others, it should be stopped. [VIEW](#)
326. I used to be a smoker for many years and have been an ex-smoker for 4 years now. I never really knew how horrible it smelt. I hate walking by the Shields building because of the people standing around or sitting on the window ledges smoking. It really stinks and messes up the lawn. If there is to be smoking on campus, it needs to be completely out of the area, away from the doors and sitting areas. It just doesn't look very good for the campus. [VIEW](#)
327. Everyone I know supports a smoke free campus. [VIEW](#)
328. I am very against smoking on campus. I think it is a big problem outside the buildings. Every time I need to go either in or out of a building I have to walk through a cloud of smoke from the people smoking just outside the door. I hate breathing it in because it makes me sick, and it stinks. [VIEW](#)
329. I realize that everyone has the right to smoke, however, what about the rights of those who do not smoke and do not wish to be exposed to smoke in any way. I have allergies and smoking does affect that. I am not saying that a person cannot smoke but what I am saying is that there are others to consider besides that one individual and if a majority does not smoke then what else can be said besides... Majority Rules! [VIEW](#)
330. Smokers always congregate at entrances, make CSI a smoke free campus! [VIEW](#)
331. smokers gather at entrances, CSI should become smoke free! [VIEW](#)

- 332. Smokers are always at door ways, especially at the meyerhoffer building. Please make CSI a smoke free campus. 
- 333. Get the smokers away from the entrances. Everytime I go to classes, I'm exposed to cancer causing chemicals. Please help make CSI a better smelling college, as well as eliminate cigarette butts from on the side walks and in the parking lots. 
- 334. I respect the rights of smokers, but I hesitate to extend those "rights" into my own personal space--specifically my personal health. It makes no sense whatsoever, for example, to have a smoking area that is 20 feet away from a door, but directly in the walking path such as is the case at the library. Coming to the library from the center of campus, one often has to pass by smokers to get to the door. The alternative is to walk off the sidewalk (and in to snow or mud or weather, sometimes) to avoid second-hand smoke. I support limitations on where folks can smoke (nowhere near buildings, for example, as smoke tends to get into the ventilation system easily). I would even support a smoke-free campus. 
- 335. smokers at entrances is out of hand, and rude. 
- 336. I don't think smoking has become a problem but I do think the designated smoking areas are still to close to the buildings. 
- 337. I don't like the fact of walking from class to class and being outside where the air is supposed to be fresh and having the smokers making it dirty. There are so many of them and alot of times they are standing at the bottom of the sidewalks where the disposals are and in the winter when there is snow that is the only place to walk on the sidewalk so you have to walk right past them. they have no regard for anyone else, they will blow it right in your face as you walk past and not even think twice about it. I quite smoking when I found out that I was pregant and everytime that I have to walk past these people it lets my baby smoke as well. Second hand smoke is twice as deadly as first and I don't appreciated having to breath it in as I go from class to class to get ahead in life. 
- 338. The problem I have is that the rule is twenty feet or so from the door, so instead of being away from the door they stand on the side and blow the smoke towards the doors or they move twenty feet down but stand on the sidewalk and make it impossible to get into any door at CSI with out walking through the smoke. It is there right to smoke but it is also my right to not have to breath it. If they want to smoke then there should be a certain area where they can go away from the public. Most of your business have a secluded spot for there employees to smoke that won't come into contact with those who don't smoke. A smoke free campus would be great as well. You can not smoke on the hospital grounds. Mesa, Arizona is a smoke free town. When I lived there you could not smoke anywhere unless it was designated and if you did smoke outside the designated spot it was a ticket, you weren't even aloud to smoke with your windows down in your vehicle. This helped out alot of people who have breathing problems. Please do fix the problem because I believe the smokers are purposly blowing smoke towards the entrances of the buildings. Thank you. 
- 339. smoking is not good for anybody, the person smoking, or the person breathing in the smoke of the person smoking 
- 340. I feel this campus needs to become a smoke free campus because too many people stand right out side a doorway where it is posted that they must be 20 feet away from a door, and they don't obey the rules on campus. More needs to be done to stop this and maybe even prevent this. I am tired of walking out a door and smelling someones cigarette smoke and having them right outside the door makes me upset. 
- 341. Hurry! My lungs are dying! YES! Make this a smoke free campus. Come on! You can do it! 
- 342. Especially outside of the library. You have to walk through a wall of smoke to enter it from the east doors. 
- 343. I have run into very few who smoke on campus. Generally, most who smoke do so between classes far enough away from doors so as not to affect those coming or going. I have not had a negative experience with a smoker. So if those smokers who attend campus are polite and smoking is still legal, why should we penalize them? Beyond this I would really like to rant about something that some men on campus do that is extremely rude and I as well as many others detest=spitting on the walkways! Maybe at a future date those who care may be able to institute a penalty or maybe promote oral hygiene education for those who feel that whatever is in their mouth is so gross that they must perpetrate it on the rest of us. 
- 344. or at least enforce smoking distance from doors better 
- 345. I liked the idea two years ago of making it allowable outside the somewhat circular drive. 
- 346. We should have support groups for people to quit. Not just for there health but also for there wallets. Now since gas has gone up they could use the extra money that they get from not smoking. 
- 347. none 

348. I appreciate the help that has been given to limit the exposure of second hand smoke, which was provided by the federal government. But, I really don't think these rules are being observed and dealt with when there are students who still smoke near enterances. I am not just concerned about my own health but for everyone else who is a non-smoker here on campus! [VIEW](#)
- One concerned student
349. Education is our field how can we as an educated society, with the knowledge we have about the harm smoking does to all, permit it in our midst. Those that smoke can do so in the privacy of their homes and vehicles. [VIEW](#)
350. get rid of smokin at CSI [VIEW](#)
351. Although there are signs that there should not be any smoking within a certain area of the doors, many times I have walked out of the doors to get smacked in the face with a cloud of cigarette smoke. Not nice. [VIEW](#)
352. I have recently returned to CSI after serving as a paramedic in a large city. Most of the medical problems I encountered were smoking related. From my experience I have concluded that smoking is a pandemic that can only be cured by more education and insentive. I feel CSI has done a wonderful job of reducing the exposure of second hand smoke to it's students, however, I feel that a smoke-free campus would be advantageous for both smokers and non-smokers alike. Non smokers would be free of exposure and smokers will be privilaged with an added insentive to quit. The insentive being the added hassel and therefor an increased desire to beat the habbit. Administration shouldn't fear students leaving and attending schools that allow smoking because the tuition increase they would encounter would further reduce their ability to afford the habbit. If students decide not to quit smoking CSI is the only school in the area one can afford to attend and continue smoking. [VIEW](#)
353. I think that smokers should be considerate of others and do their best to not smoke around non-smokers. A smoking section would be fair, but to say that somone can't smoke anywhere on campus isn't reasonable. Nonsmokers complain about their rights and in the process of defending their rights, they trample the rights of smokers, who are not lesser people, or bad people, just because they choose to smoke. I think that smoking indoors should be baned everywhere because the nonsmokers cannot get away from it when its circulating inside. Out door smoking is not going to created trapped smoke that nonsmokers are forced to inhale, if a nonsmoker walks by someone who happens to be smoking, they are not going to inhale a significant amount of smoke. [VIEW](#)
354. I don't see a lot of people complaining. The only thing smokers have to do is smoke far away from the buildings. [VIEW](#)
355. I hate walking onto buildings and having too walk through a group of smokers all standing by the door consequently being forced to walk through all their smoke. They should at least be in their car. Not to mention all the cigarette butts on the ground [VIEW](#)
356. smoking is gross chewing is sweet [VIEW](#)
357. smoking is a matter of choice but also you need to remember those who don't smoke do not want to inhale somebody's else smoke and also throw your butts in the trash no one likes to pick somebody elses butt [VIEW](#)
358. If not smoke free, then push the smokers away fro door and entrances, at least 100 ft, so we don't have to walk thogh clouds of smoke to enter buildings. [VIEW](#)
359. Smoke free campus today! [VIEW](#)
360. I do not like to come into or out of a building on campus and breathe in the smoke that is present currently. [VIEW](#)
361. The smoking make me so sick easy. The smoke air give me nausea when I smell then I will get sick next day and had been vomited because of smoking. [VIEW](#)
362. I just think that it is really bad and really stink's when they come outside or inside the classroom in all the classes that I have been taking at C.S.I. ! Sincerely, Valerie Barker [VIEW](#)
363. Although I believe smoking is not a good thing, it is still an individual's right to smoke. However, I do not think their right should infringe on those who do not smoke or are allergic to it. It is not the best smell to linger on clothing or to have to walk through. I believe that some smokers are discourteous and smoke too close to entrances. If someone asks them to take their smoking a little further away they can get fairly nasty at times with their language. And some smokers are too lazy to even use the recepticals for cigarette butts. They have the attitude that the very world is their ashtray. It is a hard decision with catch-22 implications this campus has to come up with regarding smoking or not. Who would police the situation? Can it actually be enforced if a no smoking campus is voted upon. In a perfect utopian world there would not be any smoking. I personally find it disgusting and unhealthy. I have known folks who have developed serious health issues from [VIEW](#)

smoking. I do not believe the campus should turn into a police run establishment where the rights of individuals are taken away. There is also another aspect to consider. We are a community college and garner thousands of dollars in community support. Something with this big of a scope should be brought before the whole community. After all, it will effect them also. All of you who are working on this have my prayers - or perhaps I should not say that because it may offend someone.

- 364. smoking is a very repulsive habit and i think it would be great to have a smoke-free campus. an idea would be to have some sort of free counseling or some sort of program to help students quit smoking. just a thought 
- 365. I thought it was a non smoking campus, The rules just need to be better enforced. 
- 366. I don't think that smoking 20 feet from the building does anything. For instance, there are tons of people who smoke closer, and even for those who do smoke away from it any none smoker can get the effects of second hand smoke. Maybe CSI instead of trying to ban smoking on campus, because that would cause a lot of problems. We should have a designated smoking area. Something that will allow smokers to still smoke, and also provide safety for those who don't smoke. Honestly I think this would be the only plausible way. 
- 367. I was appalled at the amount of people who smoke when I first started attending school at CSI. 
- 368. In front of the library it is really bad. There is cigarette butts all over the ground in front of the shields. I am all for banning smoking on campus, I think it is a real problem. 
- 369. I get my dose of lung cancer every time I walk into the sheilds building. The smokers hang out there all the time. It is really gross, the wind blows just right and I start to cough, and I can smell it in the class rooms with the smoker kids. I don't really like it. 
- 370. I feel that the current smoking areas are adequate. People will not want to goto a college that is non smoking because, whether you like it or not, it is a form of relaxation and a tension reducers for many. Being able to have a cigaretttte before a test relieves the pressure.most people use the ash tray that are available. The current sisation is fine, leave it alone! 
- 371. It is nauseating to smell the cigarette smoke when someone has put it in the smoke bins. 
- 372. This is a great concern for me to see so many students who still are smoking even though they are aware of the harm they are causing to themselves and others. 
- 373. I think it is wrong that children who come to CSI with their parents, must walk through smoke to get to the buildings!! Some of the kids are only afew weeks old, and their singe parent must bring them with them!!! I would love a campus wide smoking ban!!! 
- 374. It is so disgusting to see the cig. butts all over-it is littering!! I should not have to smell or inhale any second hand smoke ever! Smoking takes away my right to Not Smoke! 
- 375. Although there is the required distance from building entrances that smokers must maintain, second hand smoke is still unavoidable at that distance. Particularly outside of the Shields building, where smokers often sit on the side of the building, right next to the entrance ramps. In order to get into the building, I find myself often having to walk through a cloud of smoke. I feel stupid holding my breath to avoid inhaling the smoke from a habit that I myself do not participate in, but if that's the only way to protect my own lungs, I will continue to do so. But it would be much preferred if I could walk to my classes and enjoy the fresh air with every step. 
- 376. The worst place for second hand smoke is right outside the main entrance to the library. 
- 377. Yes I am a current smoker. I believe that all smokers should have the right to smoke anywhere, but I also believe in non-smoker rights as well. I think we just need to come up with a compramise for both smokers and non-smokers, instead of taking sides. 
- 378. During the time of year which I go to school the weather is cold. If the college would build an enlosed bench to smoke in, and have it positioned away from the doors and main path of walking. Inside the building would be a garbage can and but-can. Also providing a source of heat, gas fire place, and good ventilation. If these building were near the main buildings, dorms, Sheilds,and Eagle for example would salve the problem of people walking by the second hand smoke. 
- 379. I would definitely support a smoke free campus. I am tired of walking through smoke to go through door ways to buildings. Especially by the library and the Shields. The 30feet away rule has helped but it is not enough. A smoke free campus is a great idea. 
- 380. People that smoke do smoke twenty feet away from the doors, but it is always in the walkway. There should be a smoke free campus or smoking areas away from the walkways. 
- 381. As a student I only smell cigarette smoke 3 times a week. In comparison most students are worse off in chemistry lab. Smokers are insecure, generally unhappy, and will all die early. Dont you think they have it bad enough? Of course the best solution would be to kill everyone that smokes, uses 

drugs, has aids, or has genetic disorders that make them useless to society. What a world that would be. It's hard to believe this is a serious survey when there are so many more important issues out there. Good going student senate. (Thumbs up sarcastically).

"The opinion of a sociopath"

382. The biggest problem right now is that smokers are still smoking to close to the entrances and they really do not care where they throw their butts. Every time they toss a butt on the grounds they should be given a ticket for littering. [view](#)
383. I quit smoking a little over 3 weeks ago and it feels great. I am grossed out when I smell second-hand smoke now, so I know how others felt as they walked in buildings and had to smell my drifting smoke. I don't know that a smoke-free campus is exactly proper, but stricter rules regarding designated smoking areas would make sense to implement. [view](#)
384. I really dislike having to walk by someone who is smoking to get in a building. I hardly ever see anyone stand 20 feet from the doors like they are suppose too. Thats probably because the ash trays are not 20 feet from the doors. Every time I walk around campus I hold my breath while walking by a smoker because I don't want to breath in their rat poison. I would strongly support anything to make the campus more smoke free. [view](#)
385. Many smokers are very considerate, but any progress in this area is completly supported for students and health professionals. Thanks [view](#)
386. stop people from smoking by the exits [view](#)
387. People have inflicted pain onto others for limiting the simple right to the twinkie... [view](#)
388. The smoking limit isn't far enough away from the doors and the "ashtrays" are about 5 feet from the door which often emit a foul odor. Perhaps smoking huts could be placed around campus to shield smokers from the weather and to protect non smokers from second hand smoke. [view](#)
- Studies have shown that The more education level he has(such as highschool, some college, bachelors, masters, etc..." the less apt they are to smoke.
389. I feel a handful of people would quit going to school or atleast be late to class. The craving for cigarettes are very strong. [view](#)
- I feel as long as smokers are not standing by the door leave 'em the hell alone.  
P.S. I have not a cigarette in 2 days and I'm going %\$%^ing Nuts!
390. Smoking outside buildings is a problem. I want a smoke free campus. [view](#)
391. Being exposed to second hand smoke at the place I am furthering my education is unacceptable. [view](#)
392. It is not the actual smoking outside that bothers me so much, as long as the smokers are not congregated near the buildings, but when I walk across the lawns, or on the lawns near the buildings where they smoke, it appears that they do not even have enough consideration to dispose of their butts properly -- the lawn is strewn with cigarette butts, which really gives a "trashy" look and feel to the campus. Do they think their discards just "disappear"? [view](#)
393. Everyone seems to smoke right next to the door, and I hate walking through a cloud of smoke on my way to class! [view](#)
394. I think that as long as people who smoke are not smoking near the doors of the school there is not a problem. Maybe making a designated smoking area would make both smokers and non-smokers happy. [view](#)
395. The "Smoking away from the doors" policy is not enough. I have asthma caused from a father who smoked and when I come out of a building right in the pathway of a stream of smoke it is not good. Nicotine is a drug and smokers are drug addicts you wouldn't allow pot or other drugs openly used on campus why allow the addicted nicotine users to use there drug openly. [view](#)
396. I don't think a smoke free campus is necessary. Simply make boundries and limits. For example no smoking at entrance ways or walk ways. Rope off an area outside of buildings away from the entrance and offer ashtrays for cigarette disposal. Smokers smoke thats what they do and I think a smoke free campus would be hard to enforce. Instead of somking right outside the building they would smoke on the way to their car or as they walk from building to building. Or worse try to sneak and hid it, possibly drop it, and start a fire. They are adults but they are also addicts of a lawful substance. Good luck! [view](#)
397. I do not condone the people that participate in smoking, but I do not agree with the habit. I think there are better things one could do that would not be so harmful to themselves and the environment. [view](#)

398. There is a minimum distance to be from the public access ways before you smoke. I think that if these were increased slightly and enforced, they would be acceptable. [VIEW](#)
399. Chewing tobacco should also be banned. Thanks! [VIEW](#)
400. Thank you for having this survey! This has been a problem for a while now. [VIEW](#)
401. Smoking is nasty and I don't enjoy breathing in other people's smoke, I think it would be great to have a "smoke free" environment. [VIEW](#)
402. Smoking is the least of my concerns. Smokers smoke because it helps them to deal with stress. Leave them alone. [VIEW](#)
403. Also, there have been times when I have had to walk through a cloud of cigarette smoke just to get into the building. Most of these times the smokers were even standing at the 20 foot line. [VIEW](#)
404. THERE IS A REAL PROBLEM WHEN PEOPLE ATTENDING EVENTS AT THE COLLEGE STAND RIGHT OUTSIDE THE FRONT DOOR OF THE BUILDINGS TO SMOKE. YOU CANNOT ENTER OR LEAVE THE BUILDINGS WITHOUT WALKING THROUGH THE SMOKERS FIRST. I DO NOT FEEL THAT I SHOULD BE SUBJECTED TO THE SMOKE JUST TO ATTEND AN ACTIVITY ON THE CAMPUS OR TO GO IN OR OUT OF ONE OF THE COLLEGE'S BUILDINGS. [VIEW](#)
405. Limit on how close the current smokers stand to the entrances and exits to buildings. Some people are allergic to the smoke and myself I can't stand the smell. I would love to have a smoke free campus, but that would not be fair to the smokers. [VIEW](#)
406. There has not been much enforcement with the already existing smoking prohibition at entry-ways. The smoke is even a problem from traveling to and from classes away from building entrances. [VIEW](#)
407. I don't like exiting a building a feeling like I've just smoked what's left from the person who smoked before they left to go into the building. The CSI campus is beautiful and to walk through a cloud of smoke before I enter a building is sickening. I know other people smoke and that's their right but not right outside the building I'm entering. [VIEW](#)
408. I'd rather die of natural causes not because of second hand smoke, besides it STINKS!! [VIEW](#)
409. the smokers are always right out in front of the buildings and you have to wade through the smoke to get inside. i have asthma so it is particularly a problem for me as it can start an attack. same with walking around the campus and having someone smoking in front of me. it is very unpleasant and quite stupid frankly, it is a known carcinogen [VIEW](#)
410. smoking is awful. People need to stop smoking so close to the buildings [VIEW](#)
411. I have had asthma my whole life due to my parents smoking. [VIEW](#)
412. Smoking is a dirty habit and every time I walk by an ash tray I need to hold my breath, honestly , smoking is a sanitary problem. But it is hard to infinge on the rights of adult as long as they are outside and 20 feet away from a building. Maybe there could be designated smoking areas. [VIEW](#)
413. All the signs around the buildings say to smoke away from the building but no one follows the rules and if the wind is blowing people walking into buildings get exposed to second hand smoke. I think it is disgusting. If people need a smoke break between classes they can walk out to their cars. Please ban smoking on campus! [VIEW](#)
414. I don't feel smoking is a big problem on the campus. I have never heard a complaint from anyone. Due that there is no indoor smoking on the campus the only opportunity for coming across second hand smoke is standing around someone who is smoking which is only done by the persons choice and not the fault of the smoker. [VIEW](#)
415. i honestly do not think it is harming any one at all other than those who are smoking. it is not for others to say whether or not some one can smoke. there is already the law of no smoking with in a certain distance of doors. other than that it is not your place to put more restrictons. [VIEW](#)
416. Whenever I attend classes or take my elementary students to programs on campus it is very uncomfortable and unhealthy to walk through the number of students outside the doors smoking. [VIEW](#)
417. I smoke, but I think it is a problem. [VIEW](#)
418. Smoking Kills and thay toss ther butts every werer and make it look bad on compus because of there trash. [VIEW](#)

419. I cant walk out of a building with out getting a blast of smoke in my face!! [VIEW](#)
420. Some of us smokers; try to respect non smokers, and obey all the rules why punish all of us for a few bad folks? Or have a smoking only areas at each large building.Many of our smoking areas are on the way into the front door and all must pass us smokers and many make nasty remarks,eventhough we are where its a smoking area.It feels like descrimation! [VIEW](#)
421. We are the minority of instuitions in the MV allowing people to smoke on our campus. I say we step up and enforce no smoking policies. [VIEW](#)
422. Smoking is yucky! [VIEW](#)
423. I can't stand when I walk into the library and all I smell is smoke. Its makes me smell bad and makes the campus look bad. Also, all the smokers standing outside of the Shields building...not good. Also makes the building stink. I would definitely support a smoke-free campus! [VIEW](#)
424. As a non-smoker I don't think it's right for others to have breathe in the smoke. Second hand smoke is just as bad as regular smoking. I'd love to see a smoke-free campus. [VIEW](#)
425. Everytime I walk past the entrances to buildings there is a very big "fog" of smoke smell that is horrible. At least limiting them to where they can smoke if anything would be better at least. Have a desinated area so those of us that don't want to smell the smoke or deal with smoke can avoid those areas. [VIEW](#)
426. I take several classes on the CSI main campus. Walking from building to building I see, smell, and inhale second hand smoke. The aspen building is the only building I know of that has a limit on how far away from the building the smoking must occur. However, this rule is still broken quite often. I would support a more restrictive code concerning smoking in and around the buildings. [VIEW](#)
427. I marked 8, 9, 10 yes thinking mainly about the entrance to the library. I hate walking through the smoke (and gum stuck to the sidewalk) at the east entrance. It is a bad image for our campus. [VIEW](#)
428. It is very harmful and frustrating to me when I have to enter or leave a building and the smoke is in my face and I have no choice but to breath in the toxic smoke!!! I think there should be no smoking on campus at all!!! [VIEW](#)
429. it would be nice to walk in the bulding with out smelling like smoke or buying a book that dosen't smell like smoke! [VIEW](#)
430. people should obey the "20-feet"- rule... but they don't. enforce it better! [VIEW](#)
431. Nothing ruins my day more than walking by someone smoking right into my face. I don't mind that people want to smoke, but I don't think this is the right place to do it. [VIEW](#)
432. The library entrance is absolutely ridiculous. I have to hold my breath that entire walk way to the doors. [VIEW](#)
433. The library is the main area that I have seen to have the most problems. There has been several times when I was trying to get to the door and had to hold my breath and look down because there were so many people smoking. If allowed to smoke, people should at least be courteous of those around them and not do it right by the entrance to a building. [VIEW](#)
434. Smokers have rights, too and it is unreasonable for a student with a buisy schedule to leave campus in between classes just for a smoke break. [VIEW](#)
435. Even though I'm an ex-smoker, knowing the ridiculous amount of prejudice and hatred that's already shown to smokers. It's already a harassment to them. Making CSI a smoke free campus won't do anything. CSI is composed of people who are already legal to smoke, and the consumption of tobacco is perfectly legal everywhere else. I know how much of a hassle it is to be forced to walk X amount of feet away from a building in order to smoke something you're addicted to. Quitting smoking isn't easy, and making more of a hassle to smoke won't help people at all - in fact, it just might encourage them to keep smoking out of bitterness and rebellion to the campus' tyranny. People having to pass through a tobacco smelling area for seven seconds is not and should not be a reason to outlaw smoking on campus. [view](#)
436. I am sick of going to class with people who smell like smoke!! And I'm also sick of having that smell on my clothes!!! I would love a smoke free campus!!!! [VIEW](#)
437. What's the big deal? I can choose my own life style. I am at csi for one reason, to further my education, not for people to judge me just because i smoke. [view](#)
438. i am a carton a day and smokeing bum crak is tuff. what was this survey about agin [VIEW](#)

- 439. I am tired of having to walk into the campus buildings and having to breath in the second hand smoke. Studies have shown that second hand smoke is as deadly as directly inhaling from a cigarette, even if those that don't believe this, i think that there should be something done about the situation. 
- 440. It is rather bothersome to be walking to class and walk through a cloud of second-hand smoke, because students AND instructors are smoking near the buildings. This is most troublesome near the Shields Bldg. but happens all over campus. A smoke-free campus would be wonderful! Smoking cessasion workshops held on campus is an idea. 
- 441. I should have the right to walk on campus and not have to be exposed to someone's smoking habit. There is endless evidence of the harmful affects of second hand smoke. It would create a cleaner campus with a no-smoking policy. 
- 442. I feel that if i want to smoke then I will just do it, I don't need someone to have me second had smoke. Also if there is no way for us to be a smoke free campus then smoker need to be away from entry of buildings so those that do not smoke don't have to walk in it to make us smell and breath in directly. 
- 443. In spite of the signs which say no smoking 20 feet within buildings, many students smoke right by the door and leave their butts on the ground. 
- 444. When I did smoke sometimes I would get very stressed and it really does help to have a smoke before an exam or after a hard class. I symphatize with the smokers on campus and don't see that they are hurting anyone by smoking outside 
- 445. I feel that CSI should designate an area in the middle of the inner circle for smoking. I can say that it would be hard for me to finish my education if I was not given the opportunity to relieve the pressure of the classes. I am a student that appreciates the butt cans and ashtrays that are provided for the smoking students. However I am an older student and have a bit more respect and realize it is a priveledge to be allowed to smoke on CSI school grounds. Please due not take this priveledge away. 
- 446. I like the rule of having to keep smoking away from entrances to buildings. 
- 447. I hope that CSI can be smoke-free...even if it is smoke-free within the confines of the "circlce" and smoking is only allowed in certain parking lots. The cigarette litter and the smoke clouds we all have to walk through are disturbing. I have asthma which is aggravated by cigarette smoke. Smoke-free gets my vote! 
- 448. Smoking is not a big deal? If people want to inhale the stuff, then so be it. They are outside anyway and are not going to expose me to cancer. 
- 449. I want a smoke free campus!! I'm sick of going into class and coughing or wheezing because of the smell on students clothes. Sometimes I can't breath because of the smell!! 
- 450. A solution to this is to create smoking areas where smokers can go with out bothering anyone. You can't tell people what to do with their bodies. They will smoke whether you do anything or not. 
- 451. Again today I had to walk through second hand smoke to get to my class inside the SHields building. A few people were smoking under the door overhang. If they want cancer thats fine, I just don't think I should have to walk through their DISGUSTING cloud of cancer. I smelled like smoke and had trouble breathing as I walked in. Why doesn't CSI protect us? Make these people smoke in designated areas far away from the main entrances!!! A lot of these kids smoke beacuse it is their first chance to show in dependance and look "cool." I am a former smoker and always smoked where others wouldn't be affected by my habit. PLEASE help those of us who don't want to be exposed to second hand smoke be safe! 
- 452. I have many friends that have smoked. If smoking is something that bothers someone then they need to learn how to get away from it. With my life I have many friends that have smoked and I have learned that you either put up with the smoke or you get out of their wind. Go up wind of them so that you don't get smothered by their smoke. 
- 453. I have asthma and having to smell smoke when I come out of the library causes me respiratory distress. 
- 454. People smoke outside the doors, so when entering or exiting you walk through a cloud of smoke, breathing it and smelling of it afterward? 
- 455. I think getting smoking off the compus would be awesome. 
- 456. No , I wouldn't support a smoke free campus! As a matter of fact I got to hand it to the school because you CAN smoke on campus. The fact that C.S.I. hasn't given in to the national trend of non-smokers crying about people smoking in their own homes and banned it all together, is a strong thing to say today about the REAL risk or potential danger of second hand smoke compared to some 

other problems in the world today. As long as the campus isn't littered with cig-butts, I dont see any problem at all except the same problem that people all over really have with smoking, they dont do it so they dont want to have to see it mor be exsposed to it in any way,shape,or form. I say too bad and if you dont like what someone else is doing and dont want to see it then stay home and dont watch television. The truth is that it is the most disgusting habit in the world and at the same time there is simply nothing more satisfying sometimes than the first couple of drags from a Marlboro. I have watched family members die from it and it still doesn't stop me so to the person who cries about someone standing OUTSIDE smoking in the cold, the wind, and snow , The only thing I got to say to them is worry about something that directly will affect them and to get over it so they can concentrate on the class that they are headed to. I love the fact that I can walk onto the campus with a smoke on my way to class without worrying about the law intervening, I also love the fact that alot of other people seem to be pretty interested in watching people do it and watch them mumble under there breath about it. Spineless is what they are and the fact that myself and everyone else is judged by people that we dont know just by having put a smoke up to our mouths, makes me feel sorry for the person that really dedicates any time to mis-judgeing this group. Neverthe less it really is the worst habit in the world and I wish That first couple of drags weren't so damn good.

457. Honestly I think it is iur right to smoke, I do follow the designated smoking areas, but to take that all away is just not right. [VIEW](#)
- smokers congregate around the doorways, seeking wind breaks and some shelter. For us with Asthma, or other issues, walking through the smokers is a test to see how long can we hold our breath.
458. Perhaps there could be a smoking shelter the smokers could contribute to and have built for them to use in the middle of the campus or somewhere away from the buildings. [VIEW](#)  
I do not see why the general student body should fund such a structure, but if the smokers want to smoke on campus... then let them fund a shelter for them to use.
459. I think the campus should be smoke free!! it would make the campus more comfortable for everyone!! I'm especially tired of smokers lighting up just as they get outside the door!! The smoke blows in the face of everyone behind them. [VIEW](#)
460. some people have to much time on there hands. smokers have rights too they are already abiding by campus policy by being away 20 feet from any building or door if you see someone smoking dont go near them.how hard is that . the senate and adm have alot more important items to address so get a life. if we do this then lets look at dress code . i dare you to open that can of worms !!!! were all over 18 we can make our owe decisions so move on. [VIEW](#)
461. The only problem I have with it is people leaving the filters on the ground, its not that hard to put them in the trash. Maybe have reminder signs for those who liter, its against the law! [VIEW](#)
462. Smoking kills [VIEW](#)
463. I believe that CSI needs to be smoke free, in the end it is still a school and if they dont allow it on any other school campuses including High school and Junior High then i dont believe CSI should allow it on their respected premises too. Besides im tired of seeing Cigarette Butts everywhere. [VIEW](#)
