

Veterinary Technology Program

Friday Tour

If you love animals and are looking for a career in veterinary medicine, the Veterinary Technology program may be for you! Experience a day in Vet-Tech with an Immersion Tour! During this half-day activity, you'll spend time with current students, attend classes, meet with program personnel, and observe hands-on labs. Our goal is to provide students with a first-hand look at the exciting things that happen here on campus and answer questions you have about the program and admissions process. Grab your boots and join us for a day of fun and information!

<i>Time</i>	<i>Contact/Activity</i>
8:00- 8:50 am	Clinical Laboratory Procedures class. Sit with a first-year student in "clin-lab" lecture and learn about blood smears, parasites, and many other laboratory tests used in veterinary medicine.
9:00 – 9:30 am	Meet with Program Directory Jody Rockett DVM and Student Services Specialist Naysa Shepherd to learn all about the program structure and outcomes as well as the admissions requirements and process.
9:30 – 10:00 am	Meet with a General Admissions Coordinator at the CSI Welcome Center to learn more about financial aid, housing, and campus life.
10:00-10:50	Choose between a CSI Campus Tour led by a CSI Ambassador or attend a Veterinary Pharmacology lecture with current students. A campus tour is highly recommended for students who are visiting campus for the first time.
11:00 – 11:30 am	Tour the Large Animal Clinic facility with a current Vet-Tech student and introduce yourself to our four-legged patients. We have cows, horses, goats, and other animals on campus. Don't forget to take a peek at the new Small Animal Clinic currently under construction. You could be part of the first class to experience this brand-new facility!
11:30 am – 1:00 pm	Enjoy lunch on your own in the CSI Taylor Cafe on the second floor of the Taylor building or visit one of the local eating establishments not far from campus. Lunch on campus is \$8.50 per person for the all-you-can-eat buffet.
1:00 – 2:00 pm	Observe one or both of the hands-on labs taking place at the Large Animal Clinic or Small Animal Clinic. You'll get to see our "learning by doing" philosophy in action as students practice veterinary procedures with real tools and equipment during these labs.
