CSI Receives Crash Cart Donation from St. Luke’s Magic Valley Regional Medical Center

Release Date: 01/23/20

TWIN FALLS – The College of Southern Idaho would like to thank Arlen Blaylock, Chief Operating Officer/CNO, and Brett Hobde, Project Manager, at St. Luke’s Magic Valley Regional Medical Center for a donation of 20 crash carts, or code carts, to the CSI Health Sciences and Human Services department. The carts are equipped with supplies needed when attempting to save a life during CPR and will replace toolboxes that students are currently using in the Patient Simulation Lab.

“St. Luke’s Magic Valley’s continued support of our Health Sciences and Human Services students is invaluable. It is donations like this that help bring to life the experiences we strive to create for our students in the Patient Simulation Lab. I am extremely grateful to have a partnership that supports CSI students and faculty in the education of future healthcare workers,” said Joel Peacock, CSI Patient Simulation Lab Coordinator.

St. Luke’s Magic Valley Regional Medical Center is a partner on nearly all CSI advisory boards hosted by the CSI Health Sciences and Human Services department. Partnerships and donations from the community allow students to experience lifelike training during simulations, which is something students can carry on into the workforce upon graduation. A sincere thanks goes out to St. Luke’s Magic Valley Regional Medical Center for an opportunity such as this for CSI students.
