

OUR PHILOSOPHY

We passionately believe that true learning comes from experiencing the world around us, whether through facing personal fears, engaging in shared experiences, or discovery through new adventures. The mission of the CSI Challenge Program is to not direct the journey, but rather to aid the learning process. Through seeing, thinking, communicating, and experiencing, we find that we gain a better understanding of ourselves, others, and how we view the world. The course is only wood, steel, and man-made materials; it is what is inside each one of us that makes the experience meaningful and real.

Participation in Challenge Course Programs has been shown to:

- improve communication skills
- foster teamwork and group cooperation through critical thinking
- increase self-esteem
- serve as a metaphor for real life experiences
- foster a greater appreciation and tolerance for individual difference

Ideal for businesses, school groups, teams, families, friends, or groups of any kind, everyone can benefit from a Challenge Course experience. All ages welcome!

ABOUT US

The CSI Challenge Course was established in 1990, and is accredited by Project Adventure, Inc., an international non-profit organization founded in 1971. The program adheres to the standards and guidelines of the Association of Challenge Course Technology (ACCT), the governing body of the Challenge Course industry, specifically in the areas of course construction, facilitation, training of staff, and industry standards.

Each program is custom-designed to provide participants with engaging and fun experiences while in an emotionally and physically safe environment. Each program can be altered to accommodate all participants regardless of age or physical ability.

CHOOSE YOUR OWN ADVENTURE!

OUTDOOR CHALLENGE COURSE

The outdoor course is nestled in a park-like setting adjacent to the main campus, and is the largest pole ropes course west of the Mississippi. Built to accommodate groups from 10 to 300 in size, the course offers low elements from 12 feet from the ground, and high elements up to 50 feet. Each program hosted on the outdoor course is designed to approach learning in an extraordinary setting, building a foundation for transference of new skills, language, strategies, and knowledge into the workplace and daily living. Through the utilization of games, initiatives, and elements that are both physically and intellectually challenging, an enhanced awareness and/or constructive behavior change can result.

The course consists of:

- 40 high elements
- 20 low elements
- 100+ games, portables and initiatives

INDOOR CHALLENGE COURSE

The indoor challenge course is an extension of the outdoor challenge course, including 7 high elements and a variety of portable games and initiatives.

Each program is custom designed to meet the desired learning outcomes of each group, including conflict resolution, teamwork, communication and problem solving, as well as leadership development. Groups of 50 or more should consider booking the outdoor course.

PORTABLE CHALLENGE COURSE

We can come to you! The portable course can travel to various locations including schools, conference centers, city parks and training centers. Portable course includes portable games and initiatives rather than high or low elements.
