Adaptive Release – Advanced Rule(s)

Adaptive Release functions allow instructors to develop multiple rules for a single content item or folder. For example, assignment one can be set to become available to all users in Group A after a specific date (Rule 1), but to members of Group B only after they have reviewed the chapter one documents and scored 70% or better on the practice quiz (Rule 2). Note: A Basic Adaptive Release rule is applied before advanced rules.

Follow these steps to create an Advanced Adaptive Release rule:

1. Locate the item or folder to which you want to add an adaptive release rule, and click on the down arrows.

2. Click Adaptive Release: Advanced to create, view, or modify complex rules.

3. Click Create Rule and type a name in the Rule Name field.

4. Click Submit.

The Manage Criteria page appears. From this page you can add, delete, or edit rule criteria. Using an Adaptive Release rule, you can control the availability of a content item or folder according to the following criteria:

- Date and time
- User list or group membership
- Grade Center data
- Review status

Note: You cannot add more than one of the same types of criterion to a single rule.
Adding a Date Criterion

You can set a criterion that displays the item or folder only after or until specific dates. By setting the Display After and Display Until dates, you can create a range of dates within which the content is available.

5. Click **Date** under the **Create Criteria** button.

6. Check the **Display After** or **Display Until** box, or both.

7. Specify the appropriate dates.

8. Click **Submit**.

Adding a Grade Criterion

Content items can be released based on attempt or score. For example, an Instructor may prepare a pre-test for Students to prepare for the final exam. A student cannot take the final exam until the pre-test has been attempted, regardless of grade. Instructors can also restrict access to an item until a certain score range is reached on a test or quiz. Only one Grade Center item may be selected for each Grade Center criterion. However, multiple Grade Center criteria may be added to a single Adaptive Release rule.

9. Click **Grade** under the **Create Criteria** button.

10. Edit the options for the grade criterion.

11. Click **Submit**.
Adding a Membership Criterion

Membership criteria allow content to appear to specific users and Groups.

1. Click Membership under the Create Criteria button.

2. Use the Username field to add individual users. Enter one or more Usernames or click browse to search.

3. Use the Course Groups boxes to select Groups by moving them from the Items to Select box to the Selected Items box by clicking the right-pointing arrow.

4. Click Submit.
