Adaptive Release – Creating a Basic Rule

Basic Adaptive Release rules allow instructors to control the availability of a content item or folder according to the following criteria:

- Date and time
- User list or group membership
- Grade Center data
- Review status

1) From within the content area to be restricted, click on the double-down arrow (chevron) next to the item or folder’s name and choose Adaptive Release.

2) Set one of the adaptive release criteria by following the instructions in the following sections.

3) Click Submit.

Setting a Date or Time Criterion

You can set a criterion that displays the item or folder only after or until specific dates. By setting the Display After and Display Until dates, you can create a range of dates on which the content is available.
Setting a Membership Criterion

You can set a criterion that displays the item or folder only to specific users. These users may be specified either in a user list or by group membership.

- To set a membership criterion based on a user list, type the usernames of the students who will have access to the content in the **Username** field. Separate each user name by a comma. If needed you can click the Browse button to search for students.

- To set a membership criterion based on group membership, select the name of a group that will have access to the content, and click the right arrow. If groups are not set up in a course, only Username options will be available.
Setting a Grade Center Criterion

You can set a criterion that displays the item or folder only to students who have attempted an assignment or achieved a certain score on an assignment or test.

1) Select a Grade Center item from the Grade Center column drop down list. Points possible on a Grade Center column are listed in brackets beside the name. The score entered must be numeric.

2) Select one of the following Grade Center conditions:
   - Item has at least one attempt
   - Score is greater than, less than, or equal to a specified value.
   - Score is between two specific values.

Setting a Review Status Criterion

You can set a criterion that displays the item or folder based on the review status of another item in the course.

1) To set a review status criterion, click Browse and select an item.

Once desired criterion has been set, click Submit.
