Creating Either/Or Questions

Creating either/or questions allows students to answer Yes/No, Agree/Disagree, Right/Wrong, and True/False.

Before choosing specific question types, you’ll want to review the Testing Overview handout. It includes basic test setup and design.

1. Hover your mouse over the Create Question tab. Move to the Either/Or option and click on it.

2. The Create Either/Or Question screen opens. Enter the Question Text in step one. (Entering a Question Title is optional)

3. Set the orientation option.

4. Set the question format.

5. Set the correct answer.

6. There are also other options available, like providing feedback for correct and incorrect answers, adding categories and keywords to the test, and adding instructor notes.

7. Once you have set options as desired, click Submit.

8. You will be returned to the Test Canvas where you can create additional test questions.
